All bids must be received 6 business hours prior to the Auction Session. Your Absentee Bid Form should contain bids for one sale only; the sale name and sale number should appear at the top. Please place your bids as early as possible. In the event of identical bids, the earliest bid received will take precedence.

Bidders MUST read through our Terms and Conditions before submitting bids. These terms contain important information regarding our guarantees, billing, shipping, and return policies.

ABSENTEE BIDS

If you are unable to attend the auction in person, and wish to place bids, you may give Goldberg's bid department instructions to bid on your behalf. Our representatives will try to purchase the lot for the lowest price possible, and will not purchase the lot for more than you indicate. This service is free and confidential. Note: Ira & Larry Goldberg Coins & Collectibles, Inc. offers this service as a convenience to clients who are unable to attend the sale in person, and although we will make every effort, we will not be responsible for error or failure to execute bids.

PLACING ABSENTEE BIDS

To place bids, please use the Absentee Bidder Form provided in this catalog. Be sure to accurately put the lot number and the maximum price you are willing to pay on each lot. Always indicate a top limit or the amount which you would bid if you were attending the auction in person. This amount should not include the buyers commission noted in chapter 16 of the "Terms and Conditions of sale".

MAIL BIDS

When bidding by mail, you frequently purchase lots for less than your maximum bid. On the floor of the auction, bidding will open at 5-10% above the second highest mail bid: We act on your behalf as the highest mail bidder. If the auctioneer recognizes no other bids from the floor, you will be awarded the lot at the opening bid. If bidding proceeds from the floor, the company, acting as your agent, bids in increments over the previous bid. This process is continued until you are awarded the lot or you are outbid by the floor.

LIMIT BIDDERS

If you have a "limit" that you must stay within you must clearly notate this limit on your bid sheet. We will buy your lots as inexpensively as possible but will not exceed your "limit".

"OR BIDS"

Alternative bids should be indicated by using the word "OR" between the lot numbers. Then if your bid on an early lot is successful, we will not continue to bid on any other lots for you. Or, if your early bids are unsuccessful, we will continue to execute bids for alternative lots until a bid is successful. Bids must always be placed in the same order as the lot numbers appear in the catalog.

TELEPHONE BIDS

Bids may be placed by telephone, but are accepted only at Ira & Larry Goldberg Coins & Collectibles, Inc. discretion and at the risk of the telephone bidder. **We will not be responsible for error or failure to notify the customer in a timely manner during the auction.** The telephone bidder must notify the company at least 24 hours prior to auction all lots the bidder is interested in bidding on. The telephone bidder should have a preconceived idea of the top limit that he/she would like to bid prior to auction. In some instances, the representative of the company will request this information at the time of auction. This information assists us in the bidding process by giving us a range to stay active in the bidding. We will not notify the auctioneer of your limit and will buy your lot at the lowest price possible.

INTERNET BIDDING

Internet bidding is available via GoldbergLive. **You must be registered with our firm to be able to participate in the internet bidding process**. You may view our online catalogs and bid live on our website. Instructions and details are available online. You must be pre-approved to bid via the web. Please note that network down time or internet speed may interfere with bidding. **All internet bids are executed LIVE on the floor during auction. We cannot stop our auction due to technical difficulties. This service is free and confidential. Standard 17.5% premium.** To log in or bid, please go to goldbergcoins.com. Click the Log in or Bid button at top left.

BUYER'S PREMIUM

The "top limit" you indicate on your bid form is for the hammer price only. Please keep in mind that a buyer's premium will be added to the successful bid price of each lot you buy and is payable by you, together with the applicable sales tax and shipping charges which is applied to the total cost of your purchase (the total cost includes the buyer's premium).

SUCCESSFUL BIDS

Successful bidders will be notified and invoiced within a few days of the sale. Prices realized are posted on our website immediately following each session, and are subject to change until the completion of the sale.

TERMS AND CONDITIONS OF SALE

These Terms and Conditions of Sale set forth the terms of a public auction sale conducted in Los Angeles, California by I & Larry Goldberg Coins & Collectibles, Inc., a Nevada corporation, California Auction Bond No. 3S95453300 (hereinafter, th "Auctioneer" or "Goldberg"). All persons seeking to bid, whether in person, through an agent or employee, or by telephone, facsimile or mail, must have a catalogue and register to bid at the auction, either by completing a registration card or by completing the bid sheet incorporated into the catalogue. The Purchaser acknowledges that an invoice describing a lot by number incorporates the catalogue by reference.

2 By submitting a bid, whether in person, by mail, by phone, by facsimile or through an employee or agent, the Bidder acknowledges (i) receipt of the catalogue, (ii) that the Bidder has read the Terms and Conditions of Sale and the descriptions for the lots on which they have bid, and (iii) that they agree to adhere to these Terms and Conditions of Sale. Ira & Larry Goldberg Coins & Collectibles, Inc. shall have the right in its sole and absolute discretion to reject any such bid received. When identical bids are received for a lot, preference is given to the first bid received as determined by the Auctioneer. A mail bid will take precedence over an identical floor bid; a Floor Bidder must bid higher than the highest mail bid to be awarded any lot.

5 Bids must be for an entire lot and each lot constitutes a separate sale. No lot will be broken up unless the Auctioneer determines otherwise. Lots will be sold in their numbered sequence unless Auctioneer directs otherwise.

6 All lots may carry a reserve. For purposes of these Terms and Conditions of Sale, a reserve means a confidential price below which the Auctioneer will not sell an item or will re-purchase on behalf of the Consignor or for the account of Goldberg.

7 The Auctioneer may open the bidding on any lot by placing a bid on behalf of the seller; a Bidder by mail, telephone or facsimile; or any other participant in the sale. The Auctioneer may also bid on behalf of the Consignor up to the amount of the reserve, by (i) accepting bids from floor agents on behalf of the Consignor, or any affiliated or related company of the Auctioneer or the Consignor; (ii) by placing successive or consecutive bids for any lot; or (iii) by placing bids in response to other Bidders.

Goldberg shall have sole discretion in determining the value of the damage caused, which shall be promptly paid by the prospective Bidder.

14 Title to any lot remains with Consignor, any secured party of the Consignor, or assignee of Consignor, as the case may be, until the lot is paid for in full by Purchaser. "In the event the lot(s) are delivered to the successful purchaser prior to full payment, Goldberg reserves the right to file a UCC Financing Statement to secure full payment."

Under some circumstances, Goldberg may agree with a Consignor (i) not to require the Consignor to pay for all or part of any items bid upon or re-purchased by the Consignor; (ii) when or where an advance has been made, to have the Consignor pay an agreed upon difference to Goldberg; or (iii) to allow an offset against other transactions with Consignor. Where the Consignor has re-purchased a lot and the lot is either returned to the Consignor or otherwise dealt with or disposed of in accordance with the Consignor's direction, or pursuant to contractual agreement, Goldberg reserves the right to so note in the prices realized or to omit a price from the price realized. Every Consignor who registers to bid in the sale, whether to "protect" a lot, or for any other purpose, agrees to all other Terms and Conditions of Sale per this agreement.

18 Lots must be paid for within 14 days of receipt of invoice or delivery. Unless otherwise agreed in writing, auction sales are strictly cash above $2,500.00 in U.S. Funds payable through a bank in the United States. Purchaser further grants Goldberg a purchase money security interest in such sums or items to the extent applicable, and agrees to execute such documents as may be reasonably necessary to grant Goldberg such security interest. Purchaser agrees that Goldberg and its assigns shall be a secured party with respect to items bought by Purchaser and in the possession of Goldberg, to the extent of the maximum indebtedness, plus all accrued expenses, until the indebtedness is paid.

21 By bidding in this sale, Purchaser personally and unconditionally guarantees payment. If the Purchaser is a corporation, the officers, directors, and principals of the corporation hereby agree to personally and unconditionally guarantee payment as part of the corporation's agreement to bid. The authorized representative of any corporate Purchaser who is present at the sale shall provide Goldberg or its agent, prior to the commencement of the bidding (or at the time of registration), with a statement signed by each principal, director and officer that they each personally and unconditionally guarantee any payment due Goldberg.

22 No bids will be accepted from Floor Bidders and Mail Bidders who have not previously established credit with Goldberg unless they first (i) furnish satisfactory credit references or (ii) deposit at least twenty-five percent (25%) of their total bids for that session(s), or such other amounts as Goldberg may require, in its sole and absolute discretion. If the auction invoice is not paid in full when due, the unpaid balance will earn interest at the rate of one-and-one-half percent (1 1/2%) per month until paid. In the event this interest rate exceeds the interest permitted by law, the same shall be adjusted to the maximum rate permitted by law. Goldberg further reserves the right to

resell the merchandise, or to have an affiliated or related company do so. Purchaser agrees to pay all reasonable attorneys' fees, court costs and other collection costs incurred by Goldberg or any affiliated or related company to collect past due invoices, including reasonable costs of any resale of the merchandise. Purchaser also agrees to pay the difference between the resale price and any previous disbursements. Money realized from the resale shall be applied as follows: (i) to pay sums due to the consignor, (ii) to pay Goldberg standard commissions and fees for the resale, (iii) to pay Goldberg any sums owed to it by purchaser, and the remainder, if any, will be paid to the Purchaser. Goldberg reserves the right to assign its interest to any third party.

24 Goldberg may at its sole and absolute discretion, make loans or advances to Consignors and/or prospective Purchasers.

25 The Auctioneer may bid for his or its own account at any auction (even though it may not be required to pay a Buyer's Commission, or other charges that other Purchasers may be required to pay) and may have access to information concerning the lots and items contained therein that is not otherwise available to the public. Any conflict of interest or claim of competitive advantage resulting therefrom is expressly waived by all participants in the sale.

26 If a dispute arises concerning ownership of a lot that has been bid upon, Goldberg reserves the right to commence a statutory interpleader proceeding at the expense of the Consignor and successful Purchaser and any other applicable party, and in such event Goldbergs shall be entitled to its reasonable attorney's fees and costs.

27 In the event of a successful challenge to the title to any goods purchased, Goldberg agrees to reimburse any Purchaser in an amount equal to the successful bid price actually paid by Purchaser at auction plus any Buyer's Commission actually paid, in full and complete satisfaction of all claims, such reimbursement once tendered by Goldberg, relieves and releases Goldberg from any responsibility whatsoever to the Purchaser, even if the instrument is not cashed or is returned.

DISCLAIMERS AND WARRANTIES

ALL ITEMS OFFERED IN THIS CATALOGUE ARE GUARANTEED TO BE GENUINE. THIS IS A LIMITED WARRANTY THAT THE ITEM SOLD IS NOT COUNTERFEIT, THAT ITS DATE OR MINTMARK HAS NOT BEEN ALTERED AND THAT THE COIN HAS NOT BEEN "REPAIRED."

29 Any other warranty is expressly disclaimed; Goldberg offers no representation that a numismatic item has or has not been cleaned; that any toning is natural or artificial; that any coin will meet the standards or grade of any independent grading service; that any item has a particular provenance or pedigree, or that a numismatic item is struck or produced in a particular style. Any statement concerning such matters reflects an opinion only. Questions regarding the minting of a coin as a proof or as a business strike relate to the method of manufacture and not to authenticity.

a. The descriptions contained herein represent the Cataloger's good faith opinion, or the opinion of an independent grading service, as to the state of preservation and strike. When a grade from an independent grading service is utilized, the information is provided strictly for the convenience of the bidder by mail, telephone or facsimile. Bidders and Purchasers acknowledge that (i) grading is an art, not a science; (ii) the grades contained in the catalogue represent the opinion of the Auctioneer based upon its experience; (iii) it is possible that two people will not always grade the same items alike; and (iv) as market conditions change, grading standards change, and will most likely continue to do so in the future.

Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred on any Bidder or Purchaser by these Terms and Conditions of Sale and terms of warranty. THE GABLE-STEARNS-KENDALL NEW ENGLAND SHILLING THE FINEST KNOWN NOE 3A RARITY 7+

Enlargement

1 **(1652) New England Shilling Noe 3-A Rarity-7+ Bowers W-70 URS-4 PCGS graded XF40**. Glossy medium silvery gray and steel with slightly lighter golden silver gray toning on the highpoints. The surfaces are a bit uneven thanks to the very crude method of manufacture, but there is no corrosion and only a few trivial contact marks. A faint vertical wave down the left side of the obverse (the NE side) has been used to instantly identify this specific example for over 100 years. As with all the NE Shillings, each punch was applied separately to the planchet, and they were offset so the second stamping did not affect the first. That offset is about 180 degrees on this example. Both punches are strong but a bit unevenly impressed into the planchet leaving the top of the NE and right edge of the XII soft while the rest is clear. The edge of the planchet is slightly beveled on the lower right of the obverse and left of the reverse, as struck, but there is no evidence of post-strike clipping. The die crack or chip at the left top of the X is bold and the die line slanting from the bottom of the E in NE is clear. These two features are obvious, and that makes attributing the die variety a relatively simple task. Only 5 examples are known of this die combination, and this piece is considered by many to be finest of the 3 available to collectors (the other 2 are held in the collections of Yale University and the Massachusetts Historical Society). NE Shillings were the first coins minted in what was called the "English Americas," so their historical importance to the numismatic history of the United States can not be overstated. They were authorized by the Massachusetts General Court in 1652 and were struck in Boston under the supervision of the Mintmaster, John Hull. Only a few dozen of all die combinations have survived, and a large percentage of those are impounded in museum collections. This extremely rare die variety comes with an impressive provenance that can be traced back more than 100 years. Listed on page 37 in the "Redbook" where an EF grade is valued at $300,000, regardless of the die combination. Weight 66.2 grains. The attribution and weight are noted on the PCGS Secure label. **PCGS population total for ALL die combinations is 2 with 14 finer: 3 in 45, 4 in 50, 3 in 53, 4 in 55.**
Estimated Value $175,000-UP

Noe 1-A Willow Tree Shilling, The Noe Plate Coin The Finest Known Willow

Enlargement

2 **1652 Massachusetts Willow Tree Shilling Noe 1-A Rarity-6+. PCGS graded MS-62. CAC APPROVED.** Frosty light to medium steel and lighter silvery gray. The surfaces are smooth and attractive, void of any flaws or marks other than a nick-like depression in the planchet affecting a few of the tree limbs under SA in MASA (probably as struck) and a pair of faint hairline scratches from the D into the 1 in the date. The planchet is more oval than round (28.5 x 26.3 mm), and both sides are dramatically double struck (perhaps more than double). Both of these features are normal for the variety. The date is complete and clear, and most of the legends are readable in spite of the conflicting impressions. The Willow Tree is a jumbled mass of sharply detailed limbs thanks to the double strike. A wonderful example of the very rare Noe 1-A Willow Tree Shilling, the variety considered to be the first one struck of the "Tree" designs that followed the crude New England (NE) pieces. In fact, Willow Tree Shillings are rarer than New England shillings. Obviously the people responsible for striking these coins were going through a learning process, and it took a while to "get it right." Weight 75.3 grains. Listed on page 38 in the "Redbook" where the EF grade is valued at $295,000 while values are not included for mint state pieces because they are extremely rare. Collector' s Universe has placed a value of $525,000 on a mint state example--should one become available for sale. Well, here it is. The attribution and Double Struck feature are noted on the PCGS Secure label. **PCGS population 1, none finer**. The only Mint State example graded by PCGS and the finest graded at both NGC and PCGS.
Estimated Value $250,000-UP

The Ryder-Boyd Noe-3 Oak Tree Shilling

Enlargement

3 **1652 Massachusetts Oak Tree Shilling AN DO type Noe-3 Rarity-6 Bowers W-450 URS-6 NGC graded MS63**. Partly lustrous golden light silvery gray mixed with medium steel gray toning. The planchet is mostly smooth but there are areas of shallow granularity or erosion on both sides, especially to the right of the Oak Tree. No contact marks or evidence of clipping, and the planchet is almost perfectly round. The best identifying mark is a shallow planchet void near the rim at K-9.5 on the obverse (tree side). The strike is uneven with areas of weakness on both sides, probably because the obverse is significantly off center to K-2.5. Fortunately the date, denomination, and Oak Tree are all clear, but the AN DO feature (as opposed to the normal AN.DOM.) is incomplete due to the uneven strike; only the DO is visible. The reverse is nicely centered on the planchet. An impressive example of a very rare variety, and it comes with an important provenance that has been traced back more than 100 years. Weight 74.7 grains. Listed on page 39 in the "Redbook." The attribution, weight, and Partrick Collection provenance are all noted on the NGC label. **NGC Population 1; 2 finer in 64.**
Estimated Value .....$25,000 - 40,000

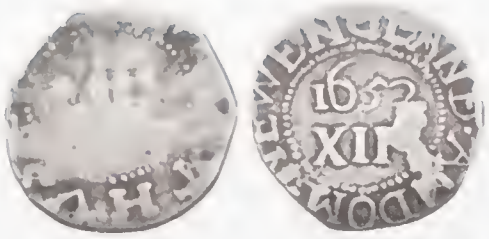
1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-4 Rarity-4 PCGS Genuine, AU details, Tooled. Very attractive frosty light to medium gray with lighter silver toning on the highpoints. Looks flawless to the unaided eye, but a glass reveals microscopic pin scratches in many of the protected areas, particularly on the reverse. There must have been some clipping done as well since portions of the legend are off the planchet, which is light at 43.8 grains. However, the devices that remain on the planchet are sharp, clearly sharper than any of the 3 Ford examples of the variety. The Oak Tree is especially bold. An impressive Oak Tree Shilling in spite of the imperfections. Listed on page 39 in the "Redbook."
Estimated Value $3,000-UP

5 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-6 Rarity-7- PCGS Genuine, Fine Details, Edge Damage**. Frosty medium silver with darker steel and gray in protected areas. No defects other than clipping that has reduced the weight to 43.9 grains. The clipping removed portions of the legend but the date and denomination are bold. Very late die state with significant swelling on the obverse side that has resulted in uneven wear on the Oak Tree. An acceptable example of this very rare variety. Listed on page 39 in the "Redbook."
Estimated Value $1,000-UP



6 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-7 Rarity-5 PCGS Genuine, VG Details, Damage.** Glossy medium silver on the devices blending to darker gray in protected areas. The surfaces are smooth and there are no notable marks. The weight is a bit light at 63.8 grains and portions of the legend are off the planchet, so some minor clipping must have occurred. The date and denomination are bold but the Oak Tree is nearly invisible thanks to the very late die state, clearly later than either of the Ford examples of the variety. Listed on page 39 in the "Redbook."
Estimated Value $1,000-UP

Ex G. H. Philpotts Sale, Kagin's 1/31/1985:1053 (lot ticket included).

7 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-8 Rarity-6+ PCGS Genuine, VF Details, Environmental Damage.** The highpoints are bright silver while the remainder of the planchet is light gray thanks to mostly uniform microscopic granularity. Probably recovered from an unfriendly environment (soil?) and lightly cleaned to remove the crud. No verdigris, crusting, or contact marks, and the eye appeal is decent. The Oak Tree is mostly clear and the legends are easily readable even though the tops of a few letters are off the planchet. The date and denomination are reasonably strong. A perfectly acceptable example of this very rare variety. Weight 66.6 grains. Listed on page 39 in the "Redbook."
Estimated Value $2,000-UP

8 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-9 Rarity-5 PCGS Genuine, Fine Details, Edge Damage.** Glossy light silvery gray fading to darker gray in protected areas. Evenly worn with a strong date and denomination and a nearly complete Oak Tree, but obviously clipped leaving parts of the legend off the planchet. The weight is light at 43.6 grains thanks to the clipping. No roughness or notable marks. Listed on page 39 in the "Redbook."
Estimated Value $1,000-UP

Ex Robert Rhue, 2003 C-4 Convention Sale, McCawley & Grellman Auctions 11/8/2003:1 (lot ticket included).

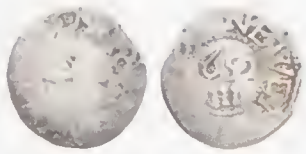
9 **1652 Massachusetts Oak Tree Shilling the "Ghost Tree" Noe-10 Rarity-6+ PCGS Genuine, Fine Details, Edge Damage.** Rather glossy dark steel gray with lighter silvery gray toning on the highpoints. The details grade is at least VF where those areas were properly struck up, but the strike was uneven. The central part of the obverse is bulged outward and the legend left of the tree is weakly struck, as is the opposing area right of the denomination. The date and denomination are bold and the lightly engraved "Ghost Tree" is mostly visible. Parts of the legend outside the beads are off the planchet, and the light weight (47.9 grains) suggests there was some clipping done to this piece. Still a decent example of the popular "Ghost Tree" type. Listed on page 39 in the "Redbook."
Estimated Value $2,000-UP

10 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-13 Rarity-6 PCGS Genuine, XF Details, Scratch.** Attractive frosty light silvery gray and steel with traces of darker toning in some of the protected areas. Reasonably well centered on the planchet, and it looks flawless to the unaided eye. A glass reveals a scuff of shallow scratches or scrapes that skip from the upper right branches of the Oak Tree to VSE in MASATHVSETS onto the rim above. Later die state with swelling across the center of the obverse. The date, denomination, and legends are complete and easily readable, and the Oak Tree is nearly complete in spite of the swelling in that area. Comparable to the Ford example except for the minor scratches. Weight 69.7 grains. Listed on page 39 in the "Redbook."
Estimated Value $3,000-UP

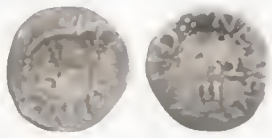
11 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-13 Rarity-6 PCGS Genuine, Fine Details, Edge Damage.** Glossy medium to dark gray and steel with lighter silver gray toning on the devices. There is a dull dent at the left top of the Oak Tree that caused a minor bulge close above the opposing 5 in the date. In addition there is a fissure in the planchet at the first T in MASATHVSETS (as struck). The weight is a bit light at 50.9 grains, so there must have been some clipping done. The date and denomination are clear as is most of the legend although many of the letters are partially off the planchet. A later state of the Noe-13 variety with obvious reengraving of the tree trunk that left a split down the center of that trunk (sometimes called N-13.3 or N-13.6). Listed on page 39 in the "Redbook."
Estimated Value $1,500-UP

2 **1652 Massachusetts Oak Tree Shilling IN at Bottom Noe-14 Rarity-4 PCGS graded VF20**. Attractive glossy medium silvery gray with slightly darker gray toning in protected areas. The surfaces are smooth and void of any notable defects other than an obvious planchet fissure (as struck) at the rim passing through the I in IN. The obverse is slightly misaligned to K-6 leaving a couple letters tight to the edge of the planchet. The reverse is nicely centered and those legends are complete. Late die state with swelling and die scaling across the middle of the obverse weakening much of the Oak Tree. Weight 70.9 grains. Listed on page 39 in the "Redbook."
Estimated Value $2,000-UP

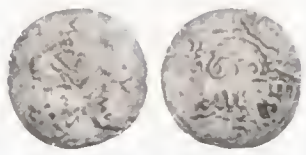
3 **1652 Massachusetts Oak Tree Sixpence IN on Obverse Noe-22 Rarity-5 ANACS graded VF20 Details, Damaged**. Glossy medium to dark gray with lighter steel gray toning on the devices. Both sides are unevenly worn thanks to a few dents and resulting bends in the planchet, and a glass reveals fine scratches that are mostly lost in the toning plus two lines of tiny impressions left of the date. The date is easily readable but the V in the denomination is lost. The obverse (tree side) is off center to K-1 but the reverse is reasonably well centered on the planchet. Far from perfect but still an acceptable example of this tough denomination of the Oak Tree type. Weight 32.7 grains. The attribution is noted on the ANACS label. Listed on page 39 in the "Redbook."
Estimated Value $1,000-UP



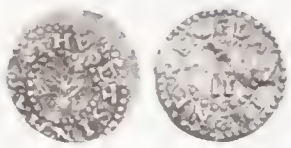
4 **1652 Massachusetts Oak Tree Threepence All 3 S' s Backwards Noe-23 Rarity-6 PCGS Genuine, Good Details, Damage**. Frosty light to medium silvery gray with darker steel gray toning in some of the protected areas. The strike is uneven with some of the details of Fine sharpness while others are faint or missing. The date and denomination are clear and significant portions of the legends are visible on both sides (including two of the three backwards S' s). The only notable marks are an "X" lightly scratched across both sides. The PCGS label incorrectly identifies this as a "2 Pence" dated "1662" with a "Large 2." Since the date and denomination are so clear on the coin, I suspect this was an administrative error in producing the label. Listed on page 38 in the "Redbook."
Estimated Value $600-UP



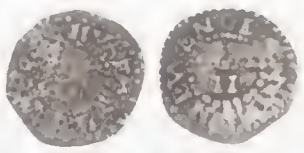
15 **1652 Massachusetts Oak Tree Threepence All 3 S' s Correct Noe-25 Rarity-6 PCGS graded VG10**. Glossy medium gray and steel. The surfaces are a bit uneven and the tops of some of the legends are off the planchet, but overall the eye appeal is nice for the grade. The only notable marks are a scuff of old scratches near the rim right of the date. The date and denomination are complete and easily readable, and most of the Oak Tree remains visible. A decent example of the denomination. The PCGS label identifies this as a "2 Pence" dated "1662" and with a "Large 2," none of which is correct. Another administrative error that PCGS (most likely) will be happy to correct for free. Listed on page 38 in the "Redbook."
Estimated Value $1,000-UP



16 **1652 Massachusetts Oak Tree Threepence All 3 S' s Correct Noe-26 Rarity-7 PCGS Genuine, Good Details, Damage**. Slightly glossy light silvery gray and steel. The surfaces are uneven, as are the details, with many elements showing Fine or better sharpness while others are weak or smooth. The date and denomination are complete and clear, and most of the Oak Tree remains visible (though not strong). A dig or dent on the first N in ENGLAND is the only notable mark. The PCGS label incorrectly shows this is dated "1662" and is a "2 Pence" denomination. I am rather confident PCGS would be willing to correct the label error free of charge. Listed on page 38 in the "Redbook."
Estimated Value $600-UP



17 **1662 Massachusetts Oak Tree Twopence Small 2 Noe-29 Rarity-6+ PCGS graded VF35**. Frosty bright silvery gray with slightly darker silvery gray toning in protected areas. The surfaces are a bit uneven but there does not appear to be any damage or other indications that would explain the wavy appearance. The obverse (tree side) is slightly misaligned to K-7 while the reverse is centered on the planchet (both normal for the variety). The 2 in the date is only partially visible thanks to a wave on the top of that digit, but everything else is clear. In fact there is very little actual wear on this piece, only the highpoints displaying any friction at all. A nice example of this tiny silver coin authorized for minting in 1662 by representatives of the Massachusetts Bay Colony. Weight 10.03 grains. Listed on page 38 in the "Redbook."
Estimated Value $1,500-UP



18 **1662 Massachusetts Oak Tree Twopence Small 2 Noe-29 Rarity-6+ PCGS Genuine, Fine Details, Damage**. Glossy medium to dark gray with slightly lighter gray toning on the devices. The reverse is smooth and void of notable defects but the obverse is covered with tiny rectangular marks that weaken most of the tree and legends on that side. The reverse is much better, but there is a dull dent or pinch that flattens the legend at the bottom. The date is easily readable (although the top of the 2 is distorted by a die break), the denomination is strong, and much of the legend on that side is clear. Listed on page 38 in the "Redbook."
Estimated Value $1,000-UP

Beautiful Noe-2 Pine Tree Shilling

Enlargement

19 **1652 Massachusetts Pine Tree Shilling Noe-2 Rarity-5 Large Planchet PCGS graded AU55**. Glossy light bluish steel and silver with slightly darker bluish steel toning in protected areas. Nicely centered on a large planchet that has a straight-edge clip touching the tops of SA in MASATHVSETS and the tops of the opposing D A. Otherwise the devices and legends are complete and strong. The only defect is a small crack in the planchet at the rim affecting the M in DOM and the opposing backwards N in IN. A very nice example, fully equal to the finest of the 4 examples in the John Ford collection or the 5 contained in the Hain Family Collection. Weight 69.4 grains. Listed on page 39 in the "Redbook." **Pop 21; 42 finer** .
Estimated Value $6,000-UP

Attractive "Large Tree" Noe-3

20 **1652 Massachusetts Pine Tree Shilling Noe-3 Rarity-6 Large Planchet PCGS graded VF30**. The "Large Tree" variety. Glossy light gray with medium gray toning in protected areas. Lightly worn and essentially flawless except for a planchet defect that affects the left edge of the obverse and right edge of the reverse (as struck). The date, denomination, Pine Tree, and the legends are all strong where not affected by the planchet defect. A nice example of the very rare "Large Tree" variety. And it comes with an important provenance as well. Weight 64.8 grains. Listed on page 39 in the "Redbook."
Estimated Value $2,000-UP

21 **1652 Massachusetts Pine Tree Shilling Noe-6 Rarity-6 Large Planchet PCGS Genuine, XF Details, Damage**. Medium gray with lighter silvery gray toning on the highpoints. The highpoints are mostly smooth but the remainder of the planchet is covered with uniform very fine granularity. The only notable marks are a few shallow digs hidden in the limbs at the very top of the tree and a straight-edge clip (perhaps as struck) affecting the final two letters in MASATHVSETS and the opposing letters left of the date. Otherwise the legends are strong and the two backwards N' s are clear. Weight 69.1 grains. Listed on page 39 in the "Redbook."
Estimated Value $2,000-UP

1652 Massachusetts Pine Tree Shilling Noe-6 Rarity-6 Large Planchet PCGS Genuine, Good Details, Edge Damage. Glossy medium gray and steel. This piece is heavily worn and extensively clipped so that nearly all of the legend outside the beaded circles is gone. The date is clear, the denomination is partially visible but still readable, and most of the Pine Tree remains visible. Weight 34.8 grains. The PCGS label calls this a "Small Planchet" type, but it is small because of the clipping, not by design. Listed on page 39 in the "Redbook."
Estimated Value $600-UP

Very Rare Noe-7 Pine Tree Shilling

Enlargement

23 **1652 Massachusetts Pine Tree Shilling Noe-7 Rarity-6+ Large Planchet PCGS graded XF45.** Variety with a very large "6" in the date, a backwards first N in ENGLAND, and an especially tall Pine Tree. Rather glossy medium steel gray with darker gray toning in protected areas. The date is strong and the recutting on the 6 that created a grossly oversized numeral is obvious. The legends are bold and easily readable, although the tops of some letters are off the planchet. The notable marks are a small dent under the denomination that created a minor bulge at the opposing spot left of the tree trunk, and two planchet voids or struck-through errors at the bottom of the reverse (apparently as struck). A premium example of this very rare variety in spite of the minor defects. Weight 66.9 grains. Listed on page 39 in the "Redbook."
Estimated Value $4,000-UP

24 **1652 Massachusetts Pine Tree Shilling Noe-8 Rarity-4 Large Planchet, Monogram NE PCGS Genuine, VF Details, Tooled.** Glossy medium steel gray. The devices are not especially strong but the surfaces are smooth and everything is easily readable with the exception of the 5 in the date, which is weak. The "Monogrammed" NE in NEW is strong. There are some dull, faint vertical scratches in the field right of the Pine Tree and a dig or attempted puncture on the last S in MASATHVSETS. The "Monogrammed NE" variety has a separate listing on page 39 in the "Redbook" where it is called a "Ligatured NE." An acceptable example of this interesting variety. Weight 58.3 grains.
Estimated Value $1,000-UP

25 **1652 Massachusetts Pine Tree Shilling Noe-9 Rarity-6 Large Planchet PCGS Genuine, Fine Details, Scratch.** Glossy medium steel gray blending to slightly darker gray in some of the protected areas. The surfaces are smooth but a bit uneven thanks mostly to an old vertical bend or wave in the planchet left of the tree. The date, denomination, and legends are all easily readable, although a few elements are weak or slightly off the planchet. There is a dull diagonal scratch visible to the unaided eye at the top of the reverse plus a few lighter scratches left of the tree and several minor dents on either side of the trunk. 26 **1652 Massachusetts Pine Tree Shilling Noe-16 Rarity-2 Small Planchet PCGS Genuine, VF Details, Plugged.** Rather glossy light silvery steel with darker medium steel gray toning in the protected areas. The devices are strong and well balanced, and the eye appeal of this piece is excellent. No notable marks or other defects. The PCGS label says this piece is "plugged," but we can find no evidence to support that assessment. Rather this piece was double struck and many of the devices overlap creating an odd appearance that may have led to the "plugged" determination. In our opinion this is a very nice double-struck example that deserves a strong grade. Careful inspection is recommended. Weight 65.8 grains. Listed on page 39 in the "Redbook."
Estimated Value $1,000-UP

27 **1652 Massachusetts Pine Tree Shilling Noe-18 Rarity-6+ Small Planchet PCGS graded VG10**. Mostly glossy light silvery gray with darker steel gray toning covering the protected areas. The legends are complete and easily readable, although a couple letters are relatively weak. The date is clear and the denomination is bold. The only marks are some light scrapes or scratches under AT in MASATHVSETS. The so-called "Bird' s Nest" break in the right branches of the Pine Tree is clear. Weight 70.6 grains. Listed on page 39 in the "Redbook."

28 **1652 Massachusetts Pine Tree Shilling Noe-20 Rarity-7 Small Planchet PCGS Genuine, VG Details, Damage**. The only notable marks are a some light scratches on both sides, none distracting. The date and denomination are easily readable and most of the legends are clear. PINE TREE SHILLING

29 **1652 Massachusetts Pine Tree Shilling Noe-25 Rarity-5 Small Planchet PCGS graded XF40**. Glossy dark gray and olive brown. Struck slightly off center to K-9.5 leaving the tops of a few letters off the planchet. The notable flaws are a natural planchet fissure over SETS and microscopic granularity in the fields on the reverse. The rosette right of the Pine Tree is faint, which is normal for this die variety. The date and denomination are quite bold. The "W" in NEW was made using two V' s, a feature that is obvious on this variety because they were spaced slightly separated. A nice piece in spite of the imperfections. Weight 70.3 grains. Listed on page 39 in the "Redbook." **Pop 56; 65 finer** .
Estimated Value $3,000-UP

30 **1652 Massachusetts Pine Tree Shilling Noe-26 Rarity-5 Small Planchet PCGS graded VG8**. Rather glossy medium gray and steel with slightly lighter gray toning on the devices. The planchet is slightly bent causing uneven wear. The only notable mark is a planchet flake or void between the bases of the 1 & 6 in the date, and the void extends down into the top of the X below. Struck from a very late state of the dies with a cud break connecting the 2 to the base of the D and a die crack that extends to the rim above that D. Obviously quite rare in this state, which was not represented in the Hain or Ford collections. Weight 67.2 grains. Listed on page 39 in the "Redbook."

31 **1652 Massachusetts Pine Tree Shilling Noe-28 Rarity-6+ Small Planchet Fair-2 (Sea Salvaged)**. Medium silvery gray and steel with traces of darker crust remaining after restoration following recovery from the sea. The planchet is bent and the devices are incomplete, but the date, denomination, and much of the Pine Tree remain visible, enough to allow the variety attribution. This is one of the pieces recovered from the wreck of the H. M. S. Feversham, a British warship lost off Nova Scotia in 1711 and salvaged in 1996. Weight 49.8 grains. In addition there are a few fine scratches on both sides, the strongest of these in the field above the date. The date is strong, the denomination is clear, and most of the legends are visible. Extremely Rare 1792 Birch Cent America' s First Pattern Cent

Enlargement

37 **1792 Birch Cent Judd-4 Pollock-5 Rarity-7 PCGS graded VG10**. The obverse is sharper and evenly struck with the devices clear and the legends complete, but portions of the reverse are noticeably lighter. The reverse was unevenly struck, strong at the top but faint elsewhere, and ONE CENT inside the wreath is not visible. The legend and fraction outside the wreath remain readable. Attractive glossy medium brown and light chocolate. The surfaces are smooth and there are no notable marks. The edge lettering TO BE ESTEEMED * BE USEFUL * is clear. Eight examples of this variety are currently traced, and only a dozen Birch Cents are known for all three varieties combined. Obviously these were struck in very limited quantities to be used as patterns for the decision-makers in our fledgling government. They are widely considered to be officially sanctioned prototypes for our first US Cents, and the Judd-4 variety was struck with a weight very close to the 208-grain standard set by Congress late in 1792. The Birch Cents are named for Robert Birch, the New York engraver employed to design and prepare the dies, and "BIRCH" shows in raised letters on the truncation over the 17 in the date. A very important piece of our numismatic history. Listed on page 89 in the "Redbook" where the Fine grade is valued at $250,000. This may be the only "affordable" example available in today' s marketplace, and a gem mint state piece sold in 2015 for more than $2.5 million. Gem Washington Funeral Medal In Gold The Finest Known

Enlargement

38 **(1800) Washington Funeral Medal Uniface in Gold Baker-169 R7- PCGS graded MS65**. Beautiful lustrous bright yellow gold with hard, prooflike fields while the devices are frosty giving this piece a wonderful cameo appearance. The only marks are a pair of shallow planchet depressions at the rim over IN behind the portrait and a bit of very light shaving at the rim over WORL. Neither defect is distracting and this piece offers exceptional eye appeal. This one is clearly the finest we have ever seen. A beautiful and extremely rare example of a funeral badge worn to honor our first President at parades and other commemorations held around the country following Washington' s death in December of 1799. These were made by Boston goldsmith and jeweler Eben Moulton as a "ladies medal" and some were made into custom pieces of jewelry by adding bezels or creating holes for suspension. About a dozen are known to have survived, and many of those are held in museums or other permanent collections housed in private institutions. A rare opportunity to acquire a significant and very attractive piece of early American History. Oval shaped, 24 x 28 mm. The attribution is noted on the PCGS Secure label.

Glossy dark gray and steel with lighter silvery gray on the highpoints. There are numerous fine scratches and small contact marks in the fields on both sides, none distracting in its own right but far too many to ignore. The obverse depicts a seated Louis XVI of France pointing to a shield emblazoned with America' s 13 bars being hung by Ms. Liberty on a pillar. On the reverse is Pallas Athena standing beside the arms of France, Britain, Spain, and Holland. The copper plug is positioned on the heavy baseline over the L in MDCCLXXXIII. Liberty Cap Half Cents

46 **1793 C-1 or C-2 R3 Half Cents Liberty Cap facing left Basal State-1**. A heavily worn piece that is moderately corroded. No verdigris or contact marks, and the toning is a decent medium chocolate brown blending to olive brown in protected areas. The reverse is slick but there are enough details remaining on the obverse to say this is definitely a 1793 half cent. The Liberty Cap facing left is easy to see and faint pieces of the date and LIBERTY can be made out with some effort. A hole filler for this tough date.

50 **1804 C-13 R1 Plain 4 without Stems PCGS graded XF45**. Glossy olive brown and chocolate mixed with lighter frosty brown on both sides. No roughness or verdigris, only small contact marks, none notable. EDS, Manley state 1.0. Weakly struck at UNITED, which is characteristic of the early state, and the dentils are sharp. This piece was struck twice with an offset of less than a millimeter between the impressions. Nonetheless, the doubling is obvious on all the design elements on both sides, strongest along the profile of Ms Liberty. The "Mint Error" and "Double Struck in Collar" features are noted on the PCGS label. **Our grade is VF35.**

Double Struck, Reverse Brockage Maker

51 **1804 C-13 R1 Plain 4 without Stems VG7**. Glossy medium steel brown and chocolate blending to darker chocolate brown in protected areas. The surfaces are smooth and attractive for the grade, a nick near the rim behind the head being the best identifying mark. This piece was struck twice. One strike was centered on the planchet but the piece failed to eject before being struck a second time. The second strike was rotated 30 degrees CW and slightly off center to K-5. The second strike was against the obverse die on that side leaving obvious "naked-eye" evidence of the rotated strike on the portrait. The reverse was struck against a new blank planchet on the second impression thereby creating an incuse brockage of the reverse on that planchet and causing characteristic swelling or unevenness on this piece. A neat "double error."

Popular 1799 S-189 Cent

189 **1799 S-189 R2 F15**. Ten points sharper but covered with minor roughness under glossy medium chocolate brown and steel toning. No verdigris or significant contact marks. M-LDS, Breen state V, with a short but clearly visible die crack from the upper edge of the bust toward the rim and narrow rim cud breaks at OF-AM. Struck with the dies out of proper axial alignment (the die faces were not perfectly parallel) and that created a bold impression at the bottom of the obverse and top of the reverse while leaving LIBERTY and the bottom of the reverse very weak (a striking variation for the variety discussed by Breen in his large cent encyclopedia). In addition there seems to have been some debris, perhaps lubricating grease, on the upper part of the reverse die that left some minor low spots around the top of the wreath. Not perfect but still quite nice for a 1799 cent. And the date is as bold as you would see on a cent with a significantly higher grade.
Estimated Value $6,000-UP

Another 1799 Cent

190 **1799 S-189 R2 PCGS Genuine, Fine Details, Damaged**. Sharpness VF35 but covered with uniform fine to moderate granularity under rather glossy dark olive brown and chocolate toning. M-LDS, Breen state IV, with clearly defined rim cud breaks at F-AM. The 17 is relatively weak but the rest of the date is clear and the legends are complete. **Our grade is net VG10**. The attribution is noted on the PCGS label.
Estimated Value $3,000-UP

Ex R. J. Rudolph Collection.

191 **1799 S-189 R2 AG3**. Slightly glossy dark olive brown and chocolate with lighter brown and chocolate toning on the highpoints. The highpoints are smooth while microscopic roughness covers the fields and protected areas. No verdigris, and the only mark is a tiny chip or pit on the bust. The upper two thirds of the date is clear but the lower third is fading into the rim below. Nonetheless the date is easily readable and most of the legends are readable but not strong. A decent lower grade example of this popular date.

Certified High Grade 1804 Cent

243 **1804 S-266c R2 NGC graded XF45**. Glossy dark chocolate brown with lighter chocolate brown toning on the devices. Hints of lighter reddish brown toning in the center of the reverse testify to an ancient cleaning, but this cent offers great eye appeal. No roughness or verdigris, only trivial contact marks. A diagonal nick very well hidden in the curl left of the date is a good identifying mark, but it is easy to miss, even with a glass. Sharply struck LDS, Breen state IV, with bold cud breaks at RTY and MERIC. A premium example of this popular date. **Our grade is EF40+ sharpness net VF35**. Housed in an older generation NGC slab.

247 **1804 Restrike AU55**. Choice glossy light to medium chocolate brown. No defects, just a light touch of rub on the highest points. Late die state with die cracks and obvious die rust, as usual. These "cents" were struck outside the US Mint in the late 1850' s or early 1860' s by Joseph J. Mickley, who obtained the dies as scrap metal. The obverse is from the 1803 S-261 variety with the date altered to 1804, and the reverse is from the 1820 N-12 die variety. Both dies were heavily lapped in an attempt to minimize the rust that had formed since they were discarded. These private "Restrikes" have been popular with collectors since they first appeared for sale in the mid-1860' s and are listed on page 102 in the "Redbook."

318 **1823 Restrike AU58**. Choice glossy medium brown and lig chocolate with underlying frosty mint luster in the fields ar protected areas. A beautiful example, void of any spots, stair or contact marks. Just a hint of friction on the highest poir from mint state. Late die state with all the rim cuds and c cracks clear, including the final crack down through TE STATES. These "Restrikes" were made privately outside tl mint using discarded mint dies sold as scrap. The obverse c used was the normal Newcomb-2 variety of 1823, but appa ently a reverse die of the type used in 1823 was not availat and they substituted a reverse die that had been used for tl 1813 Sheldon-293 variety. The result was an "1823" cent th looked nothing like the genuine mint product, but it filled a ne for collectors since this date has always been a challenge high grade. Breen says 49 uncracked examples were struck 1862 for Joseph J. Mickley before the obverse die broke, and unknown number of pieces were struck from the cracked die This piece must have been one of the last struck.

Flying Eagle Cents

Popular 1856 Flying Eagle Cent

Enlargement

870 **1856 S-9. PCGS graded Proof 64 PQ. CAC APPROVED.** Only 1,500 minted of this new and extremely popular Flying Eagle design. In the early 1850s the Mint had received numerous complaints about the cumbersome size of the current "Large Cents", which did not fall on deaf ears. Patterns of various types were ceated to test different replacements for the One Cent coin. Meanwhile Joseph Wharton, the owner of the western hemisphere nickel mines decided it was time to put quantities of his unusual metal to use. What could be better than selling the nickel for use in coinage? Patterns were struck with this mysterious metal nickel and it was discovered that it was dreadfully hard and not that conducive to coinage, literally breaking dies. In the end a blend of 25% nickel and 75% copper was selected for the new Flying Eagle cent. When these initial 1856 Flying Eagle cents were released the public loved them. Later when the 1857 Flying eagle cents entered circulation people lined up for blocks to buy them. At long last the cumbersome era of pocket bursting Large cents came to an end. These rare and desirable 1856 Flying Eagle cents led the charge and remain one of the most collectible coins of the United States. Lincoln Cents

Super Gem 1909-S VDB Lincoln Cent

Enlargement

881 **1909-S. VDB. PCGS graded MS-66+ Red**. Popular key date. Rich mint red colors remaining. This is one of the finest examples of this rarity. Only 484,000 were struck and the vast majority of the survivors are circulated today. Gems are highly coveted, especially when they retain any original Red color. Here is one that offers everything a collector could desire, gorgeous Red color, exceptionally clean surfaces and a bold strike. Furthermore this coin is just a half grade point for the absolute finest seen by PCGS of this issue. **Pop 16; 14 finer in 67. (PCGS # 2428)**
Estimated Value ..... $15,000 - 17,000

1909-S VDB Lincoln Cent

Enlargement

882 **1909-S. VDB. PCGS graded MS-66 Red**. Well struck with lots of red color. This is the first year of issue for the Lincoln cent, and it is interesting to note that this design was adopted to commemorate the 100th year of Lincoln' s birth in 1809. Designed by Victor David Brenner h placed his small initials at the base of the reverse, but the powers that be didn' t like such a display or such a bold signature appearing on every cent. The V.D.B. initials were ordered removed, but the coins released continued to circulate. While large numbers of Philadelphia Mint coins are available, only 484,000 San Francisco pieces were struck, making this issue the lowest mintage to date for this series. Finding a stellar Gem like this is quite an accomplishment for the advanced collector. **Pop 204; 30 finer, 16 in 66+, 14 in 67. (PCGS # 2428)**

Estimated Value .....$1,000 - 1,100

886 **1911-D. PCGS graded MS-66 Red**. Well struck with lots of mint red and this is one of the more challenging early mint-marked dates to obtain. Precious few were saved, and from that meager beginning one can only imagine how few retained this degree of original Red color! Not many indeed, especially when combined with such glorious surface quality. **Pop 40; 6 finer, 5 in 66+, 1 in 67. (PCGS # 2446)**
Estimated Value .....$3,000 - 3,200

Key Date 1916 Liberty Standing Quarter

Enlargement

946 **1916**. **PCGS graded MS-65 Full Head**. Popular key date and very frosty with abundant luster throughout. The strike is unusually sharp for this first year of issue, and colectors have always sought out these Full Head examples when they are available. there is a hint of gold tone on both side of this elegant gem. The surfaces are exceptionally clean and attractive, and hours of enjoyable time will be spent by the future owner of MacNeil' s fantastic design.

These new Standing Liberty quarters were designed and approved in 1916, but production wasn' t expected until 1917. However, on the 25th year of Barber coin production, the first allowable year for a change as required, the Mint went forward and started striking 1916 Standing Librety quarters. However, these were initiated until the final two weeks in December. Only 52,000 pieces were struck before production began on 1917 quarters. Both the 1916 and initial 1917 quarters were released at the same time in large batches. Few noticed the 1916 issue, and little fanfare came forth, so saving any of the 1916 quarters was strickly a random event. Of course, as soon as they beautiful coins were released the nakedness of Liberty' s breast found great offense in the ever puritanical Amercian population, and demand for a more modest design rang out. Soon Librety was properly covered over in a chain mail frock, and no longer exposing herself to the narrow minded. **Pop 75; 26 finer** . (**PCGS # 5705**)
Estimated Value .....$24,000 - 25,000

Popular 1916 Liberty Standing Quarter

Enlargement

947 **1916**. **NGC graded MS-63**. Lovely blue and golden toning on both sides. The head is almost full. Popular key date. Only 52,000 struck all of which were released with a much larger batch of 1917 Type I quarters. Hence these tended to be overlooked by the public, who promptly saved the 1917 quarters as the first of their kind. The 1916 quarters have a slightly different shape to Liberty' s gown just above the date, and these can be identified even if the date is worn smooth. Finding a choice example like this requires by patience and numismatic fortitude. **Pop 54; 95 finer at NGC.**
Estimated Value .....$15,000 - 16,000

Gem 1917-S Liberty Standing Type 1

948 **1917-S. Type 1. PCGS graded MS-67 Full Head.** A spectacular example of this popular San Francisco issue. The strike is bold throughout, including Liberty' s head and all the bosses on the shield. Mostly bright silver but with handsome golden accents noted around the rims and devices. A loupe finds virtually no signs of handling, and the surfaces are miraculous in quality. The Type 1 quarters were only issued for a few months before the demand went out to change the design and cover Liberty' s exposed breast. Sadly this was done and the Type 2 style was born. This coin is a true delight. **Pop 13; 2 finer in 67+.** (**PCGS # 5711**)
Estimated Value .....$7,500 - 8,000

949 **1917-S. Type 2. PCGS graded MS-65.** CAC APPROVED. A blazing gem! Mostly white and frosty. **Pop 77; 30 finer with 28 in 66, 2 in 66+.** (**PCGS # 5718**)

Estimated Value .....$3,000 - 3,200

951 **1923-S. PCGS graded MS-64.** Lovely golden toning on bot sides. The head is ¾ full but the leaves just are not quite 10 percent. A desirable example of this tough San Francisco issue and one which many date collectors lack as these are elusiv and hard to find so attractive. Notice the frosty luster and del cate gold glaze on both sides, which combine to make thi example highly appealing and desirable! (**PCGS # 5744**)
Estimated Value .....$3,200 - 3,30

952 **1924-S. NGC graded MS-65 Full Head.** A nice frosty whit coin. A few reverse marks that blend well into the silver whit patina, with a sharp strike that is worthy of consideration by an specialist. Lovely 1811 Capped Bust Half Dollar.

960 **1811. Small 8 Overton-110 Rarity 1. NGC graded MS-65**. Nicely toned and well struck. This coin is tied for the fourth finest of the variety according to Steve Herrman' s Auction & Mail Bid Prices Realized for Bust Half Dollars 1794 - 1839 "The toning is glorious and rich with old silver shades that offer deep jewel tones when examined under a light. The strike is sharp too, with all of Liberty' s curls brought up well along with the eagle' s tiny feathers. Early Capped Bust half dollars are seldom found in gem condition, and this offering is certainly something worthy of note." **Pop 1; none finer at NGC for the variety.**

964 **1813. 50C over "UNI". PCGS graded MS-63 PQ**. Boldly struck with lovely gold and blue toning on both sides. This is a plentiful die marriage but really tough to find this nice and attractive. The surfaces are oustanding and the eye appeal is amazing. The engraver, when creating the reverse die totally blundered here, with UNI placed where the denomination belonged, realizing the error, the denomination was engraved over the errant UNI where the legend was started **Pop 10; 10 finer, 8 in 64, 1 in 64+, 1 in 65**. Enlargement

1024 **1799/8. 15 Reverse Stars B-3, BB-141 Rarity 3. PCGS graded EF-45**. Even grey toning which offsets the fields from the devices in a most handsome manner. The surfaces are smooth and attractive too, as there are minimal signs of handling. The strike is decent, with bold definition on Liberty' s curls and the eagle. Struck a trifle off center, with thin denticles on the left side, much longer on the right side, but this does not effect the design.

This popular variety is highly collectible as it offers two unusual features, the obverse of course has the overdate, with the final 9 punched over a previous 8, then the reverse has the blundered star count over the eagle, where 15 stars were engraved, then the mistake was noticed and the engraver covered over two of the extra stars by enlarging two of the clouds to cover the stars! The clouds on the far left and far right were expanded with considerable engraving skill, but telltail star points remain poking out of the enlarged clouds when carefully examined. This important *Guide Book* variety is a popular and historic example of the early days at the Philadelphia Mint. **Pop 32; 79 finer** . (**PCGS # 6883**)
Estimated Value ..... $4,000 - 4,400

1069 **1882-CC Paritial Collar. MINT ERROR. NGC graded MS-65.** A lovely white gem example that is not only a poplar Carson City issue but a prized Mint Error! Morgan dollars, although struck in vast numbres, were incredibly well made in that so few mint errors are known. The coining equipment and the inspection process must have been really stepped up to have caught the normal mint blunders before they escaped the mint and entered circulation. Considering the numbers produced for this series, it is truly a testament to quality control that so few errors escaped into collectors hands. Thus the collectors who seek an example of an error from this series, really have to fight for one of these when it appears. Add in the gem quality of this coin, the Carson City mintmark and the partial collar error and you have a combination that will make every other collector jealous! Destined for an advanced collection.

The Finest 1921 Morgan Dollar. Zerbe

Enlargement

1136 **1921. Zerbe**. **NGC graded Proof 67**. Fully white and a lovely gem. Only 200 minted for Farran Zerbe who was a major coin promoter during this era. When the Great War ended in 1918 and permanent peace was establised for the future of mankind Zerbe was one of many dealers behind the promotion of the Peace silver dollar. However, delays in design and production of the new Peace dollar thwarted Zerbe' s peace promotions in the summer of 1921. Zerbe' s deep connections at the Philadelphia Mint realized that Zerbe needed to be consoled and so along with the resurrection of the Morgan Dollar in 1921, a group of 200 1921 Morgan dollars were struck with Special strikes on polished dies but with regular planchets. The coins do not quite have the full brillance of earlier proofs, and heavy die polish lines are visible on the devices--as struck.

Perhaps 150 of these exist today and this one is the finest graded between NGC and PCGS as the sole Superb Gem of this prized special issue. Several months after these were sold out by Zerbe, the Peace dollars were finally ready to strike, and another page in history turned. We are proud to offer what is likely the Finest Known of this rare and desirable Special strike! **Pop 1; none finer at NGC** . (**PCGS # 7341**)

Gem 1923 $5 Note

1241 **1923, $5 Silver Certificate. PCGS Superb Gem New 67PPQ. Fr-282. KL-252.** An outstanding example of the popular "Porthole" design type, so-called because of the circular border around Lincoln' s portrait that conveys the impression that he is peering out of a ship' s window. The colors, inks, and paper quality are nearly flawless on this exceptional example, and the centering and margins are well above average as should be expected for the grade. This is one of just a half-dozen examples of this note that PCGS has graded 67PPQ, with just two notes (a pair of 68s) any finer. It comes from a serial number run of high grade pieces that were saved long ago, likely as a part of a bank' s cash reserves. Collectors today can thank the farsighted dealers and collectors of decades ago who rescued these notes for hobbyists to enjoy today.
Estimated Value .....$20,000 - 25,000

246 **1914, $5 Federal Reserve Note. New York. Fr-851c. PCGS graded Gem New 65PPQ.** A breathtaking gem example. It is likely the type c $5.00 1914 FRN' s should be considered a distinct type with the seals pushed toward the center, as such, they are considerably underpriced.

In addition, the afordability of high grade notes adds to their appeal. This note has plenty of eye appeal with the bright fibers scattered about.
Estimated Value ..... $400 - 600

1254 **1914, $10 Federal Reserve Note. Fr-951a.** A gorgeous "pack-fresh" darkly inked and perfectly centered example. This gorgeous San Francisco $10 has never been certified to our knowledge. **Gem Crisp Uncirculated.**

Gold Certificates - Large

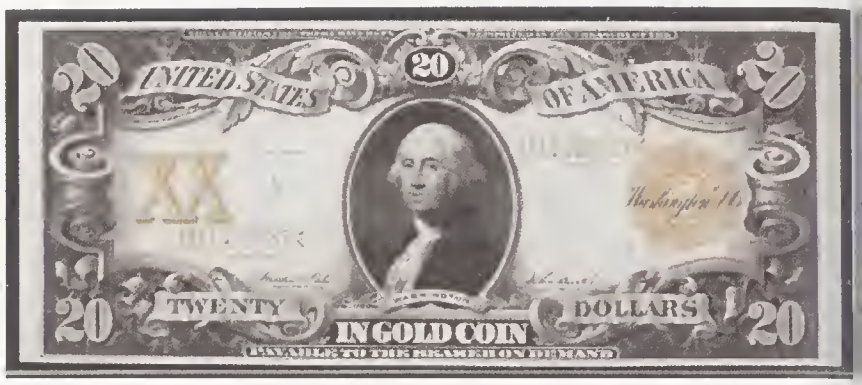
Gem 1907 $10 Gold Note

1255 **1907, $10 Gold Certificate. PCGS Gem New 65PPQ. Fr-1172. KL-441.** This broadly-margined Gem displays vivid orange-gold coloration on both the face overprint, and on the back design. The paper is strictly original, with bold embossing evident throughout. While Fr. 1173s with the Speelman-White signature combination are often available (for a price) in a high state of preservation, the earlier Tehee-Burke Fr. 1172 is much scarcer in higher grades. This piece possesses both technical merit and aesthetic appeal, a combination that makes it an ideal example for an advanced type set or Friedberg number collection.
Estimated Value .....$4,000 - 6,000

1256 **1922, $10 Gold Certificate. PCGS Choice New 63PPQ. Fr-1173. KL-442.** This Gold Certificate has all the visual appeal, originality, and eye-popping colors of a much higher grade; the centering, however, is slightly skewed with a tight top margin to the left, therefore limiting the grade.
Estimated Value ..... $1,200 - 1,500

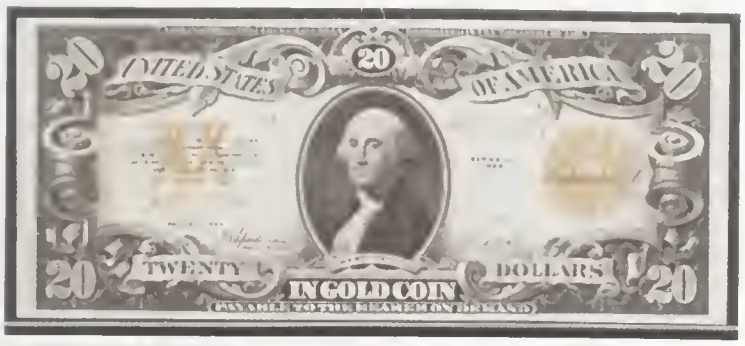
1257 **1906, $20 Gold Certificate. PCGS Very Fine 35. Fr-1182. KL-559.** This gorgeous Gold Certificate possesses vivid colors and inks. Despite a number of light folds that define the grade, it has the appearance of a much higher grade example.
Estimated Value .....$1,500 - 1,700

Gem 1906 $20 Gold Note



1258 **1906, $20 Gold Certificate. PCGS Gem New 65PPQ. Fr-1186. KL-563.** Vivid colors contrast ideally with bright, original paper on this Gem example. The face centering is suggestive of an even higher grade, and the margins on both sides are fully framed. Few notes could surpass this beauty in terms of pure eye appeal, and PCGS has graded just a handful (five to date) of Fr. 1186s any finer to date.
Estimated Value ..... $5,000 - 6,000

Gem 1922 Gold Note



1259 **1922, $20 Gold Certificate. PCGS Superb Gem New 67PPQ. Fr-1187. KL-564.** This flawless Gold Certificate is a rare exception to a rule: Fr. 1187s almost always come with tight top and bottom margins, due to the position of the engraved notes on the printing plates being very close together. This piece has boardwalk margins all around, and the colors are spectacular. The paper is bright and free of any flaws, providing excellent contrast on both sides. The originality is readily evident, with embossing visible from all parts of the design and overprint. While a small handful of Fr. 1187 mule variety notes have been graded a point higher by PCGS, no Fr. 1187 non-mules have graded any finer than this example. This one is as spectacular as any, and any advanced collector would consider this a prize for which it is worth stretching an extra bid or two.
Estimated Value ..... $7,000 - 9,000

Gem $50 Gold Note

1260 **1922, $50 Gold Certificate. PCGS Gem New 66PPQ. Fr-1200. KL-705.** This sale features several outstanding high grade Gold Certificates, with this the highlight of them all. The $50 denomination is much scarcer than $10s and $20s of the same series in all conditions, even more so in the upper reaches of uncirculated grades. **This Gem is one of but four pieces graded 66PPQ by PCGS, with only one example finer to date.** This note deserves every bit of the assigned grade, with bold, vivid colors, and exceptional originality. The centering and margins are outstanding on both sides. High grade $50 Gold Certificates are seldom available on the market, which means that any collector who wishes to obtain a true Gem can wait for quite some time between offerings. This example is as nice as any other that we' ve seen, and likely cannot be topped in terms of sheer appeal.
Estimated Value .....$25,000 - 30,000

1265 1863, 5¢ Fractional Currency. Second Issue, with surcharge 18-63 and R-1. PCGS Very Fine 35 Apparent. Fr-1235. KL-3229. This is a much scarcer fiber paper variety, moderately circulated and marred only by a light stain near the right edge of the face--which was the cause of the "apparent" designation from PCGS.
Estimated Value ..... $125 - 175

1266 1864, 5¢ Fractional Currency. Third Issue, red reverse. PCGS Choice New 63. Fr-1236. KL-3254. This red reverse example is limited in grade by a tight left margin.

Estimated Value ..... $100 - 125

1268 1862, 10¢ Fractional Currency. First Issue, perforated edges, without monogram. PCGS Choice About New 55. Fr-1241. KL-3214. Although slightly off center and with a couple of minor scuffs on the back which account for the grade, this perforated "no monogram" 10¢ example faces up nicely and would not look out of place in a set of higher grade notes.
Estimated Value ..... $125 - 150

1269 1862, 10¢ Fractional Currency. First Issue, straight edges, without monogram. PCGS Choice About New 55. Fr-1243. KL-3216. This "no monogram" straight-edge variety is pleasing for the grade, with no flaws save for some trivial handling.

Estimated Value ..... $600 - 800

1272 1863, 10¢ Fractional Currency. Second Issue, with surcharge 18-63 and T-1. PCGS Very Fine 35. Fr-1249. KL-3235. A fiber paper variety note with good eye appeal for the grade. Well centered on both sides, the bronzing is a little cracked but no more so than one would expect for the grade.
Estimated Value ..... $150 - 200

1273 1869, 15¢ Fractional Currency. Fourth Issue, large red seal, watermarked paper. PCGS About New 50PPQ. Fr-1267. KL-3332. Some light handling and a tight top margin are the only mentionable distractions on this fully original example. The red Treasury seal is as bold and vivid as any we've seen on this variety.
Estimated Value ..... $80 - 100

74 **Third Issue 15¢ Face Specimen. Wide Margins. PCGS Choice New 63PPQ. Fr-1272SP.** A pretty Grant-Sherman face specimen, with just a trivial bit of handling in the margins preventing a higher grade.
Estimated Value ..... $800 - 1,000

1277 **1869, 15¢ Fractional Currency. Fourth Issue, large red seal, paper with violet silk fibers. PCGS Choice New 63PPQ. Fr-1269. KL-3334.** Although the centering is slightly skewed, the overall eye appeal of this note is simply amazing. The contrasting colors, boldness and richness of the inks, and the vividness of the blue security fibers all combine to create a visually breathtaking composite. Fully original and with exceptional perfection in every technical merit save for the aforementioned centering.
Estimated Value ..... $125 - 150

1278 **1862, 25¢ Fractional Currency. First Issue, perforated edges, with ABCO monogram. PCGS Choice New 63PPQ. Fr-1279. KL-3217.** While the face centering is slightly imperfect, this perforated 25¢ fractional is otherwise fully pristine. The colors, inks, and outstanding eye appeal add to the paper' s strict originality. The perfs on the right edge are just a little short towards the bottom, otherwise the overall appearance is virtually unimpeachable.
Estimated Value ..... $225 - 275

1279 **1862, 25¢ Fractional Currency. First Issue, perforated edges, without monogram. PCGS Choice About New 58PPQ. Fr-1280. KL-3218.** This "no monogram" perforated example displays excellent eye appeal and only a single light bend that defines the grade. 1311 **1928-C, $1 Silver Certificate. PMG Gem Uncirculated 66EPQ. Fr-1603. KL-1448.** Well margined, boldly embossed, and with lovely colors. This is one of the key issues of the small size Silver Certificate series, third only to the 1928D and 1928E issues in the $1 denomination in terms of scarcity in all grades.
Estimated Value .....$1,250 - 1,750

1312 **1934, $10 Silver Certificate. Mule Star Note. PCGS Very Fine 20. Fr-1701*. KL-1966*.** A replacement of the scarcer "mule" variety, with a larger back plate number on the back signifying a plate that was actually meant for the later 1934A series notes.
Estimated Value .....$200 - 250

1313 **1934-B, $10 Silver Certificate. PCGS Very Fine 25. Fr-1703. KL-1968.** The 1934B series is much scarcer than any of the other 1934-dates series of $10 Silver Certificates, and is the second key to the entire small size $10 Silver Certificate collection surpassed only by the famous 1933 rarity. This is a problem-free circulated example with plenty of eye appeal.
Estimated Value .....$200 - 250

National Bank Notes - Small

1314 **A pair of Type 2 $5 National Bank Notes. Fr-1800-2.** Consists of: **The Anglo California National Bank of San Francisco, California; The First National Bank Note of Elko, Nevada. Notes will both grade VG.** Lot of 2 notes.

1316 **1929, $10 National Bank Note. National Spraker Bank in Canajoharie, New York. Fr-1801-2. KL-1244. PMG graded Choice Uncirculated 64 EPQ.** A spectacular "fresh out of the weeds" gem quality note on a popular New York town. It has been over 6 years since a certified CU note has been publicly available.
Estimated Value ..... $500 - 750

1317 **A bundle of 100 $50 Federal Reserve Notes, Series of 2004.** The original pack with wrapper. All sequential numbers with stars. **Notes are in Choice UNC conditions.** A total of $5,000 face value. Lot of 100 notes.
Estimated Value ..... $7,000 - 7,500

1318 **A bundle of 100 $5 Federal Reserve Notes, Series of 1999.** The original pack with wrapper. All sequential numbers with stars. **Notes are in Choice UNC conditions.** A total of $500 face value. Lot of 100 notes.
Estimated Value ..... $700 - 750

1319 **1988-A, $1 Federal Reserve Note. Web Note. PCGS Very Fine 30PPQ. Fr-1917-F.** A solid circulated example of this very scarce first print run note from the short-lived web press, from the Atlanta F-L serial number block.
Estimated Value ..... $75 - 100

1320 **1988-A, $1 Federal Reserve Note. Web Note. PCGS Extremely Fine 40PPQ. Fr-1917-G.** A lightly circulated and strictly original example from the scarcer Chicago G-Q serial number block.
Estimated Value ..... $75 - 100

1321 **1950-C, $5 Federal Reserve Note. PCGS Gem New 66PPQ. Fr-1964-G.** This broadly margined Gem from the Chicago district is one of only 5 examples from this bank to receive the 66PPQ grade to date by PCGS, with only three finer. As the marketplace finally begins to give small size Federal Reserve Notes the attention that they' ve long deserved, it is becoming apparent that there are many grade rarities among many series. This is likely due in part to them being long-ignored, as even high grade examples were seldom saved--particularly in any quantities.
Estimated Value ..... $50 - 7

1322 **1969, $5 Federal Reserve Note. PCGS Superb Gem New 67PPQ. Fr-1969-D.** This lovely Cleveland $5 is tied for the finest known, with only this note and three others graded at the 67PPQ level by PCGS to date.
Estimated Value ..... $75 - 10

1323 **1981-A, $5 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-1977-J.** This Kansas City Gem is tied for finest known at PCGS Currency with only one other note graded at the 65PPQ level to date (PMG by comparison has graded two 65EPqs and two 66EPqs).
Estimated Value ..... $75 - 10

1324 **1981-A, $5 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-1977-L.** The 1981A series has proven to be one of the scarcest of all "modern" $5 FRN series, with a surprisingly small quantity of high grade notes surviving. This San Francisco example falls just short of a Gem grade.
Estimated Value ..... $40 - 6

1325 **Ten Different Certified "Modern" $5 Federal Reserve Notes. Fr-1979-C.** This is a nice starter collection of $5 Federal Reserve Notes from more recent issues, including three star notes: Fr. 1979-C 1988 (Philadelphia) 64PPQ; Fr. 1979-E 198 (Richmond) 65PPQ; Fr. 1980-G 1988A (Chicago) 65PPQ; Fr 1980-L 1988A (San Francisco) 64PPQ; Fr. 1985-F 1995 (Atlant FW) 66PPQ; Fr. 1985-F* 1995 (Atlanta FW) Star Note 65PPQ Fr. 1985-G 1995 (Chicago FW) 65PPQ; Fr. 1987-L 1999 (Sa Francisco FW) 66PPQ; Fr. 1988-L* 2001 (San Francisco FW Star Note 66PPQ; and Fr. 1991-B* 2003A (New York FW) Sta Note 66PPQ. The 1995 Atlanta star note is quite scarce, with a original printing of just 384,000 notes; and the 2003A New Yor star note was released only in uncut sheets. Lot of 10 notes.
Estimated Value ..... $300 - 40

1326 **1928-A, $10 Federal Reserve Note. PCGS Very Fine 25 Fr-2001-G.** A solid circulated Chicago district example, fror this early series with the numbered district seal at left.
Estimated Value ..... $40 - 5

1327 **1928-B, $10 Federal Reserve Note. DGS Star Note. PCG Very Fine 20. Fr-2002a-G*.** A scarce star note from the Chicago district bank, with the dark green seal variety.
Estimated Value ..... $50 - 7

1328 **1934-A, $10 Federal Reserve Note. Star Note. PCG Very Fine 20PPQ. Fr-2006-H.** A perfectly original circulate example of this rare St. Louis star note, which is one of just half-dozen pieces graded by either of the two major gradin services.
Estimated Value ..... $150 - 20

1329 **1950, $10 Federal Reserve Notes. Wide and Narrow Pair. PCGS Very Choice New 64PPQ. Fr-2010-G.** A nic pair of matching near-Gem notes from the Chicago district, eac displaying the two different back plate varieties. While not changeover pair, the two notes bear close serial numbers ju 58 numbers apart. Lot of 2 notes.
Estimated Value ..... $120 - 15

30 **1950, $10 Federal Reserve Note. Narrow Star Note. PCGS Very Fine 20PPQ. Fr-2010-H*.** This very scarce St. Louis star note is the narrow back plate variety, and one of just two examples graded by PCGS Currency to date (the other is an error note). The marketplace has relatively ignored small size Federal Reserve Notes for many years, but there are plenty of signs that this is changing. New research combined with increased collector interest is creating increased demand, and previously unknown rarities such as this note will continue to see strong demand as the market adjusts to the reality that some of these early small size Feds are indeed far rarer than was previously suspected.
Estimated Value .....$150 - 200

31 **1950-A, $10 Federal Reserve Note. Star Note. PCGS Choice About New 58PPQ. Fr-2011-G*.** A light center bend is the only grade-limiting factor on this fully original and boldly embossed Chicago star note.
Estimated Value .....$125 - 175

32 **1950-B, $10 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-2012-G.** An attractive near-Gem from the Chicago district G-F serial number block.
Estimated Value ..... $40 - 60

33 **1950-D, $10 Federal Reserve Note. Star Note. PCGS Gem New 66PPQ. Fr-2014-G*.** This spectacular Gem Chicago star note is tied for the finest graded by PCGS Currency, as it is one of just three examples (with none finer) graded 66PPQ to date.
Estimated Value .....$200 - 300

34 **1950-D, $10 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2014-G.** Boldly embossed, nicely centered, and fully original. From the Chicago district bank.
Estimated Value ..... $50 - 70

35 **1950-E, $10 Federal Reserve Note. PCGS Choice About New 58PPQ. Fr-2015-G.** This lovely Chicago example, which is held back in grade by only a light center fold, is from the much scarcer G-I serial number block. A quick perusal of the population reports from both of the two major grading services suggests that the G-I block is scarcer than the G-H block by a factor of approximately four to one.
Estimated Value .....$100 - 150

36 **1950-E, $10 Federal Reserve Note. Misalignment Error. PCGS Choice New 63PPQ. Fr-2015-G.** This series was actually run through four different printings, as opposed to most small size notes which were prepared with three printings; the series date, Treasury signatures, and other minor elements were applied separately. The series date and signatures are clearly too far south on this example, drifting slightly into the border design.
Estimated Value .....$75 - 100

37 **1963-A, $10 Federal Reserve Note. PCGS Superb Gem New 67PPQ. Fr-2017-G.** This "top pop" example from Chicago is tied for the finest certified by either major grading service, one of only 7 such examples graded 67PPQ by PCGS (two have been graded 67EPQ by PMG).
Estimated Value .....$75 - 100

38 **1969, $10 Federal Reserve Notes. Chicago Block Set Pair. PCGS Gem New 66PPQ. Fr-2018-G.** This spectacular Gem pair represents both of the serial number blocks issued from Chicago, the G-A and G-B blocks. The G-B block example is currently tied with one other note as the finest graded by PCGS. Lot of 2 notes.
Estimated Value .....$100 - 150

1339 **1977, $10 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2023-G.** This lovely Chicago Gem displays incredible embossing throughout, both of the design and the overprint.
Estimated Value .....$40 - 60

1340 **1977-A, $10 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2024-G.** Another lovely Gem Chicago $10 FRN, this from the 1977A series.
Estimated Value .....$40 - 60

1341 **1981, $10 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2025-H.** This is the only St. Louis $10 from this series to achieve the 65PPQ grade from PCGS, with only two examples finer (one a 66PPQ, and one a 67PPQ).
Estimated Value .....$50 - 75

1342 **1981, $10 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-2025-L.** This near-Gem is from the scarcer of the two San Francisco serial number blocks, with the L-A block valued higher than the L-B block in the most recent edition of the Schwartz & Lindquist reference.
Estimated Value .....$50 - 70

1343 **1981-A, $10 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-2026-B.** Although undoubtedly there are more notes in existence from this series that were saved at the time of issue than are included in the current population reports of the two major grading services, it is intriguing that PCGS and PMG have graded just seven notes combined from the 1981A New York district. This pleasing near-Gem is all alone in second place at PCGS, with a single 65PPQ the only higher graded example.
Estimated Value .....$50 - 75

1344 **1981-A, $10 Federal Reserve Note. PCGS Gem New 66PPQ. Fr-2026-J.** While the relative scarcity of notes from this series is known to collectors, exactly how rare some of these notes are remains a mystery. The facts on this note is intriguing--it is the only Kansas City $10 from the 1981A series graded by PCGS Currency to date. PMG has, meanwhile, graded three examples, two circulated pieces and a 64EPQ. As these notes become more popular with collectors, the details will emerge as to which notes are truly rare. After more than a decade, this note remains the finest known for both of the major grading services. It is unlikely that there are many more ungraded examples in existence that will challenge it for eye appeal or technical merit.
Estimated Value ..... $100 - 150

1345 **1985, $10 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2027-E.** A nice Gem from the Richmond district, with cavernous embossing that can easily be seen through the holder.
Estimated Value .....$50 - 75

1346 **1988-A, $10 Federal Reserve Note. PCGS Gem New 66PPQ. Fr-2028-E.** Because collectors, for so many years, have ignored, in a relative sense, small size Federal Reserve Notes as a whole (particularly in denominations from $5 to $100), not many of these later issued have reached the grading services. That being said, it remains clear that there simply aren't many of these that were saved in high grades at the time of issue. To date, PCGS has graded only three examples of this series from the Richmond district, with this the finest of the three. PMG, by comparison, has graded only five such examples in all uncirculated grades, which means that even without duplication (by means of crossovers) there are still, at most, eight certified uncirculated examples of this issue known. The fact that a grade rarity such as this isn't expected to bring four figures or more is an intriguing marketplace inequality which may be changing, as collectors have flocked to these notes in recent years as Silver Certificates, Legal Tender Notes, and other "obsolete" series have become more expensive to collect.
Estimated Value .....$75 - 100

1347 1928, $20 Federal Reserve Note. San Francisco. Fr-2050-L. PCGS graded Super Gem New 67PPQ. Pop 2 with none finer. Perfect centering, nice dark inks and impressive embossing all add up to being tied as the *finest known San Francisco issued 1928 note.*
Estimated Value ..... $2,000 - 2,500

1348 1928-A, $20 Federal Reserve Note Boston. Fr-2051-A. This note clearly shows original embosing and has no discernable defects that we can through the holder. Series 1928-A notes are far scarcer than the 1928 notes. As the hobby matures, collectors will someday pay larger premiums for this issue. Only 35 examples reported of the 1928-A series as opposed to 295 examples on the regular 1928 $20 from Boston. **CGA graded Gem Uncirculated 65=.**
Estimated Value ..... $800 - 1,000

1349 1928-A, $20 Federal Reserve Note. PCGS Very Fine 30PPQ. Fr-2051-G. A Chicago district $20 with moderate circulation but fully original paper and excellent eye appeal, with no mentionable flaws whatsoever for the grade.
Estimated Value ..... $100 - 125

1350 1928-B, $20 Federal Reserve Note. DGS Pair. PCGS About New 53PPQ and Very Fine 30PPQ. Fr-2052a-G. This pair of dark green seal $20s from Chicago display two different color shades of the Treasury seal. The lower grade piece has a slightly lighter seal color, which, while not light enough to qualify as an LGS variety, clearly is of a transitional seal color and could be designated as such. Lot of 2 notes.
Estimated Value ..... $125 - 175

1351 1928-B, $20 Federal Reserve Note. PCGS Extremely Fine 40PPQ. Fr-2052a-H. A fully original St. Louis DGS example, with three folds that define the grade but plenty of embossing, excellent eye appeal, and overall aesthetic merit to spare.
Estimated Value ..... $70 - 90

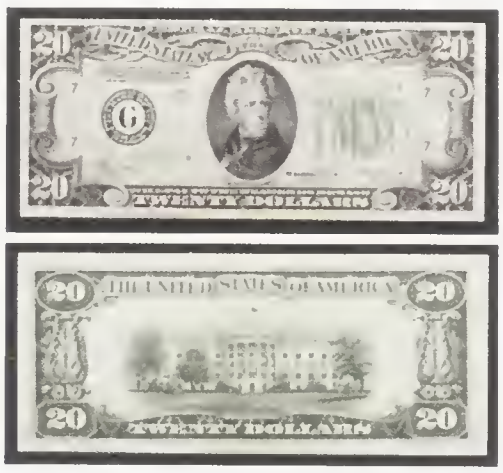
1352 1928-C, $20 Federal Reserve Note. LGS. PCGS Very Fine 25PPQ. Fr-2053-G. This is a pleasing, fully original circulated example of a very scarce series which was printed for only two district banks, Chicago and San Francisco. While this Chicago $20 is from the more "common" of the two districts, it is in an uncommon state of preservation--a completely original and problem-free note in a moderately circulated grade. Undoubtedly a note that will receive quite a bit of interest from collectors, and one that will likely inspire spirited bidding before the hammer falls as there simply aren' t enough notes from this series available, with this quality of preservation in a mid-range circulated grade, to meet collector demand.
Estimated Value ..... $500 - 700



1353 1934-A, $20 Federal Reserve Note. Mule Star Note. PCGS Extremely Fine 40PPQ. Fr-2055m-G*. A very scarce star note from the Chicago district, particularly in higher grades. This example is lightly circulated but retains excellent originality and eye appeal.
Estimated Value ..... $350 - 450

1354 1934-A, $20 Federal Reserve Note. Mule. PCGS Gem New 65PPQ. Fr-2055m-G. A gorgeous Chicago district $20, with bold embossing and excellent margins.
Estimated Value ..... $100 - 125

1355 1950-B, $20 Federal Reserve Note. PCGS Gem New 66PPQ. Fr-2061-G. Outstanding originality and broad, even margins enhance the appeal of this Gem from Chicago.
Estimated Value ..... $100 - 125

1356 1950-B, $20 Federal Reserve Note. Star Note. PCGS Extremely Fine 40PPQ. Fr-2061-G*. A few light folds define the grade on this lightly circulated and fully original Chicago $20 star note.
Estimated Value ..... $75 - 100

1357 1950-B, $20 Federal Reserve Note. Star Note. PCGS Fine 15. Fr-2061-I*. A solid circulated example of this scarce Minneapolis district star note.
Estimated Value ..... $90 - 120

358 **1950-D, $20 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2063-G.** This Chicago $20 is from the scarcer G-D serial number block, and is tied with one other example as the "top pop" from this block with no other examples graded by PCGS any finer.
Estimated Value .....$100 - 150

359 **1950-D, $20 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2063-G.** Perfectly original and pack fresh, from the Chicago district bank.
Estimated Value .....$75 - 100

360 **1974, $20 Federal Reserve Note. Star Note. PCGS Choice New 63PPQ. Fr-2071-C*.** This Philadelphia star Twenty is scarce in high grades, as PCGS has graded only this note and one other in 63PPQ with just one 64PPQ topping it for finest known honors. This centering, which is off just a trifle, is the only graded-limiting factor.
Estimated Value .....$150 - 200

361 **1981-A, $20 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-2074-J.** This note is a perfect example of how many later-date rarities have flown under the radar for so many years, and it is the lone, single Kansas City district example from this scarcer series that has been graded by PCGS to date in any grade. The centering falls just short of a Gem grade, otherwise the note is as fresh and original as the day it was printed.
Estimated Value .....$100 - 150

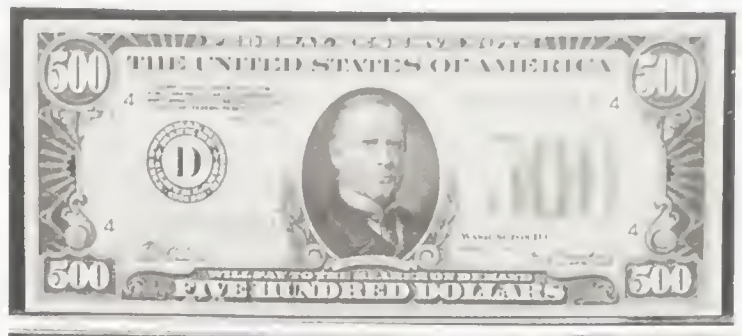
362 **A pair of 1996 4-note uncut sheet of $20 Federal Reserve Star Notes. Fr-2083-E*. Notes are in UNC condition.** A lot of 2 sheets with a total face value of $160.
Estimated Value .....$200 - 250

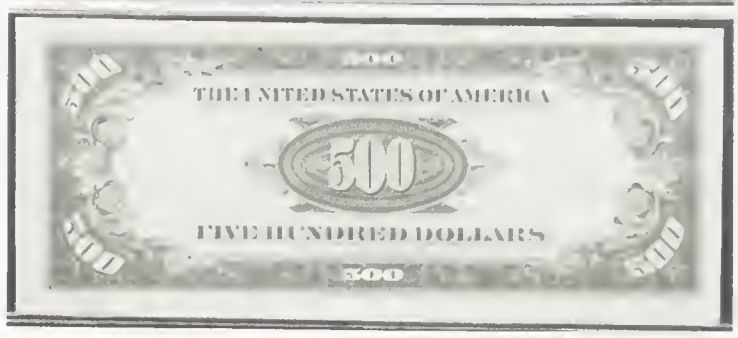
363 **1950-B, $50 Federal Reserve Note. Star Note. PCGS Extremely Fine 45PPQ. Fr-2109-G*.** This Chicago star note is only lightly circulated, with a few light bends that define the grade, and is fully original with excellent embossing still present.
Estimated Value .....$125 - 175

364 **1974, $50 Federal Reserve Note. PCGS Gem New 65PPQ. Fr-2118-G.** Of the five Chicago district notes graded by PCGS from the 1974 series, this example is far and away the finest known. In fact, it is the only uncirculated example graded by PCGS to date. It is boldly original, well centered, and as nice as could be expected for the grade.
Estimated Value .....$150 - 250

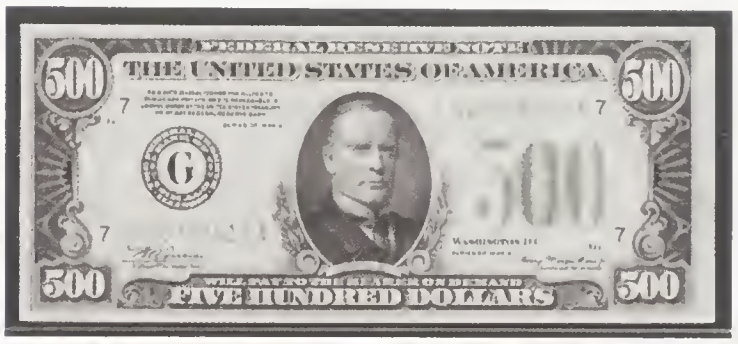
365 **2004 4-note uncut sheet of $50 Federal Reserve Star Notes. Fr-2128-G*.** This sheet comes with it' s original hardboard holder. **Notes are in UNC condition.** A total of $200 in face value.
Estimated Value .....$240 - 260

366 **1969, $100 Federal Reserve Note. PCGS Very Choice New 64PPQ. Fr-2164-L.** A pleasing, pack-fresh C-note from the San Francisco district.
Estimated Value .....$175 - 225





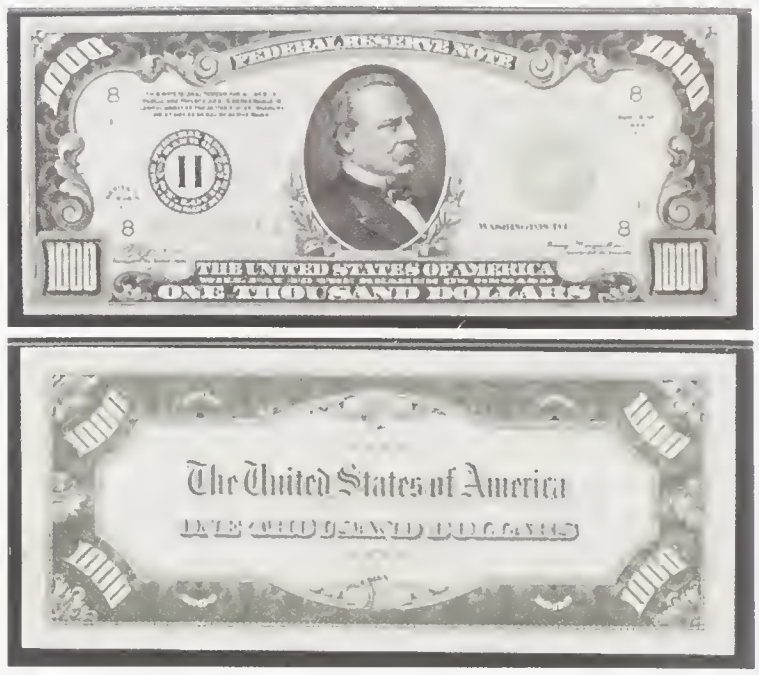
1367 **1934-A, $500 Federal Reserve Note. Fr-2202-D.** Issued by the Federal Reserve of Chicago. **CGS graded Gem Uncirculated 65.** A beautiful crisp note, however, we do not warrent the grading by CGA.
Estimated Value .....$1,700 - 1,800



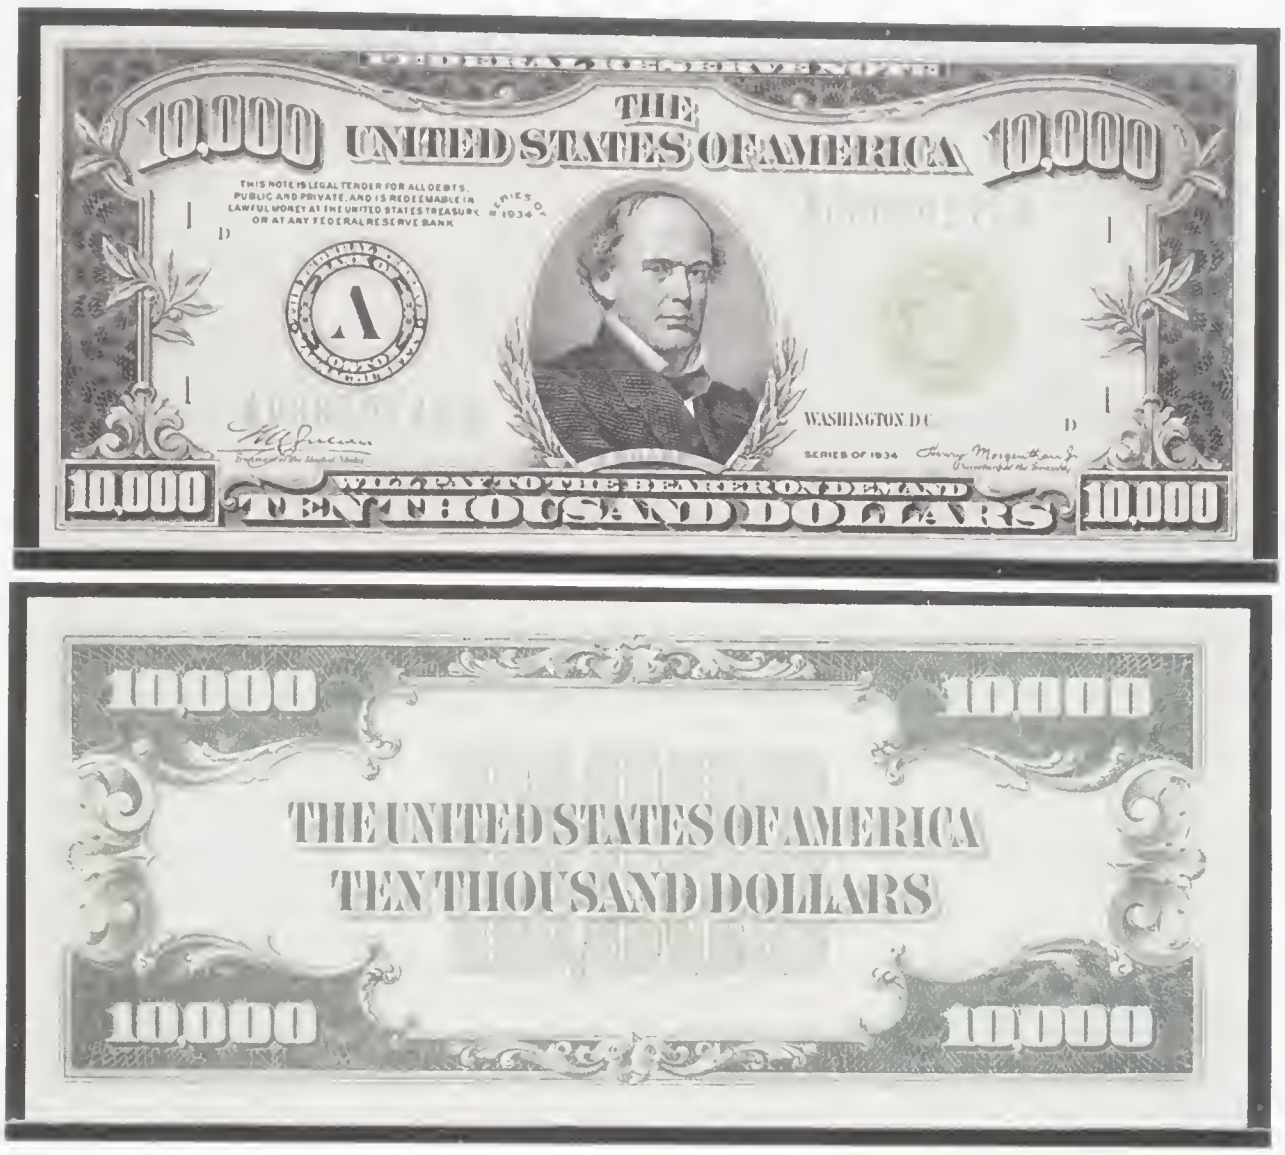
1368 **1934-A, $500 Mule. Federal Reserve Note. Chicago. Fr-2202m-G. PCGS Choice About New 58.**
Estimated Value .....$1,000 - 1,200

1369 **1934-A, $500 Chicago Federal Reserve Note**. **Fr-2202-G**. A nice clean note for the grade. **Very Fine.**
Estimated Value ..... $700 - 750

1370 **1934-A, $1000 Federal Reserve Note**. **Fr-2212-G**. Issued by the Federal Reserve of Chicago. **CGS graded Gem Uncirculated 66 Original Paper Quality.** A beautiful crisp note, however, we do not warrent the grading by CGA.
Estimated Value ..... $2,700 - 2,900

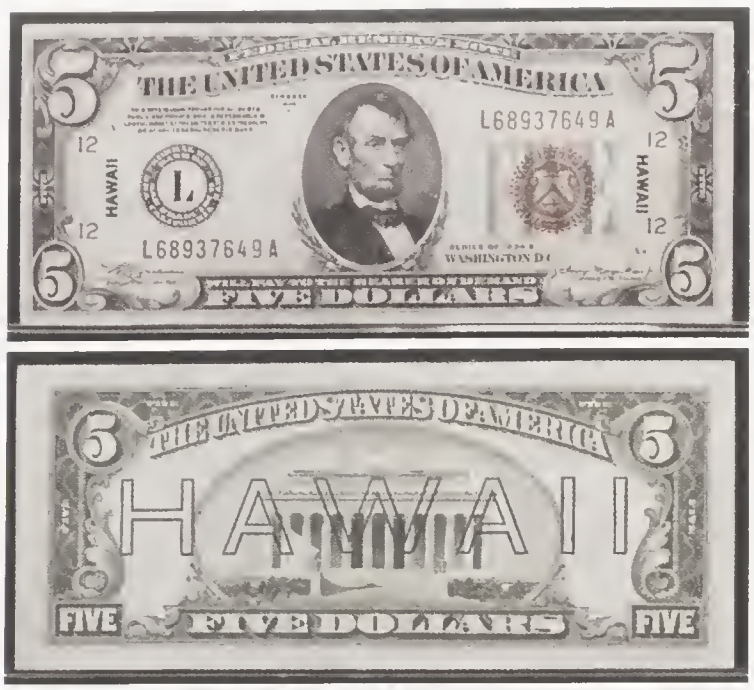


1371 **1934-A, $1000 Federal Reserve Note**. **Fr-2212-H**. St Louis (HA Block). A very choice quality note that looks Crisp Unc. **PMG 58 Choice About Uncirculated, Exceptiona Paper Quality.**
Estimated Value .....$2,000 - 2,500



72 **1934 $10,000 Federal Reserve Note. CGA Gem Uncirculated 65. Fr-2231a**. The $10,000 was the highest denomination issued by the United States government for general circulation. While most were redeemed when they were pulled from circulation many decades ago, a few hundred individual pieces have survived. In addition, a group of 100 examples was saved by the Binion' s Horseshoe Casino in Las Vegas, in their famous "$1,000,000" display. Most high grade examples that survive today are either from the Binion' s hoard, or are a result of sheer happenstance. This example, which is from the Boston district bank, was not included in the Binion' s display. It is well centered, displays excellent margins, and has terrific overall eye appeal. While CGA has since disappeared from the grading scene since the emergence of the two major third-party grading services that dominate the market today (PCGS Currency and PMG), at the time this note was graded more than 17 years ago ago CGA was the only major grading service available. While the "market grading" primarily seen on CGA-graded notes has since fallen out of favor today, replaced by a more sensible combination of both eye appeal and technical grading, it was essentially the only option back then. This note appears very nice through the holder, and, no matter what it might grade today by one of the other services, it is plenty impressive as a high grade example of a popular note that will never cease to amaze non-collector friends who have never seen any issued note above the current zenith of $100 denominated Federal Reserve Notes.
Estimated Value $125,000-UP

World War II Emergency Notes



1373 **1934-A, $5 World War II Emergency Note. Fr-2302. KL-1961**. High grade Hawaii $5.00 notes are many times scarcer then the other Hawaiian empergency denominations. **CGA graded Gem Uncirculated 66**.
Estimated Value ..... $700 - 900

1374 **1934-A, $10 World War II Emergency Note. North Africa Star Note. PCGS Very Fine 25 Apparent. Fr-2309*. KL-2260***. Although given an apparent grade by PCGS because of the missing bottom left corner tip and a light partial teller stamp on the face, this is a 98% good-looking circulated example of a star note that is difficult to locate in any grade above VF.
Estimated Value ..... $100 - 150

1375 **Pair of W.W.II Emergency Issues**. Consists of: **Fr. 2300 Hawaii $1.00 1935-a**. Together with: **Fr. 206 N. Africa $1.00 1935-A.** Graded **PMG Choice Unc. 64 EPQ and PCGS Very Choice New 64 EPQ.**

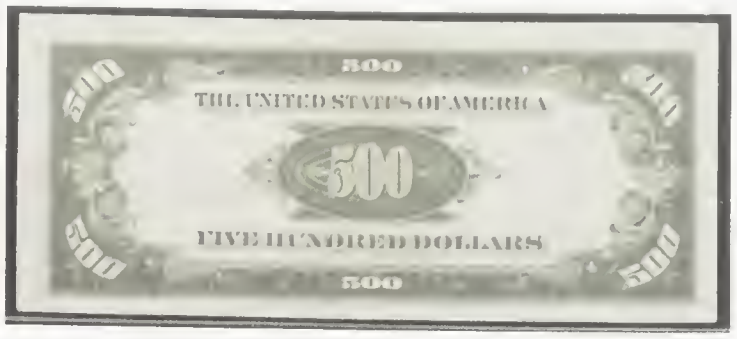
Rare $500 Gold Certificate



1378 **1928, $500 Gold Certificate. PCGS Extremely Fine 45 Apparent. Fr-2407. KL-2945.** The 1928 series was the last issue of Gold Certificates, and the only small size version of these notes that for more than three-quarters of a century kept the United States tied to some version of "hard" monetary policy. The $500 denomination is scarce in all grades, and high grade survivors are seldom seen. This piece has a few small expert repairs, as noted by PCGS on their holder, but the overall appearance is that of a pleasing, lightly circulated example. There is even original embossing evident, which suggests otherwise complete originality of the paper. It' s certainly a nice looking note, and is likely obtainable for a small discount from what a completely problem-free $500 Gold might bring.
Estimated Value .....$15,000 - 17,500

1396 **1858 Pattern Cent. Copper-nickel, plain edge. Judd-204. Pollock-248. PCGS graded Proof 65.** CAC APPROVED. A gorgeous gem specimen with delicate golden iridescent tones on both sides. This design incorporates the small flying eagle obverse with the oak wreath on the reverse of 1859, but with a larger shield than adopted even in 1860. Well struck, well preserved and a pleasing gem of this popular transitional issue. **Pop 12; 2 finer, 1 in 65+, 1 in 66.** (**PCGS # 11871**)

This one has the regular dies obverse, combined with the experimental but not adopted Motto of "GOD OUR TRUST" on the reverse, in small letters but not on any ribbon. This was the first appearance of the evolution of the new Motto on our coinage. **Pop 5; none finer at NGC.**
Estimated Value ..... $4,500 - 5,000

1398 **1862 Pattern Eagle. Copper, reeded edge. Judd-298. Pollock-357, Low Rarity 6. Sharpness of Proof-58.** Some light hairlines.

1399 **1879 Pattern Quarter Dollar. Silver, Reeded Edge. Judd-1593. Pollock-1787 Low Rarity 7. PCGS graded Proof 66 Cameo. CAC APPROVED.** The popular Morgan Dollar Liberty Head on a quarter denomination. Fully white and with boldly mirrored fields contrasting against the frosty white devices. The obverse design incorporates a reduced size but exact head from the Morgan silver dollar, with the date below and E PLURIBUS UNUM surrounding with 13 stars placed between the last two words. For the reverse a standing eagle clutches an olive branch in his right claw, three arrows in his left. Legends include UNITED STATES OF AMERICA and QUARTER DOLLAR surrounding with a much smaller sized letter punch used for IN GOD WE TRUST in the lower fields besides the eagle. Only a single coin graded finer in the Cameo contrast category and a rare seen but quite popular issue with collectors. (**PCGS # 134091**)

1403 **1861-D. PCGS graded AU Details, Cleaning.** Lightly toned. Only 1,000 struck and this is a key date issue that is seldom offered and most were cleaned long ago. The Dahlonega Mint issued coins in somewhat limited numbers from 1838 until the Civil War broke out in 1861, so these were the last coins struck during that turbulent time. **Should be graded AU-50 in our opinion.** (**PCGS # 7559**)

Lovely 1889 Gold Dollar

1408 **1807 BD-1, R-3.. PCGS graded EF-40.** Lightly toned with a few scattered marks, one in the right obverse field is mentioned for identification. The Capped Bust, Heraldic Eagle type is one of the most challenging issues to find. The total mintage of the series was tiny, and while note as rare as some single year type issues, this is still a series which few collectors will ever own even a single example. Not only were the mintages modest, but the number of survivors is meager. Only 6812 minted, from which perhaps 250 to 350 of these are known. This is indeed a tiny number to represent what is considered to be one of the more plentiful issues of this type. An opportunity to secure a handsome example of this important coin. (**PCGS # 7656**)

1411 **1839. PCGS graded AU-55 PQ CAC Approved Gold Sticker**. Housed in an Old Green Holder. Only 27,021 minted of which merely 115 examples are estimated to have survived. Boldly struck with lovely golden toning. Highly original and a delightful coin that will please any specialist. **Pop 19; 18 finer, 10 in 58, 7 in 61, 1 in 62.** (**PCGS # 7698**)
Estimated Value ..... $4,000 - 4,500

Enlargement

1412 **1840-O. NGC graded AU-55**. Nice even gold toning on both sides with slightly deeper gold hues on the uppermost devices. Only 33,580 struck and from that meager beginning a scant 125 or so are known today. The strike is decent, although the left thigh of the eagle shows moderate striking softness, common to this issue. This is one of the finer examples technically, as most fall into the XF-40 to AU-55 range. Finer pieces quickly become prohibitive for most collectors to pursue, especially in any Mint State grade. **Pop 20; 39 finer at NGC.** (**PCGS # 7720**)
Estimated Value .....$2,400 - 2,500

Enlargement

1413 **1842-O. NGC graded AU-50**. Light even toning on both sides. The 1842-O is one of the tougher New Orleans issues to find at all, especially so in high grade. Furthermore, these usually come poorly stuck up, not so here, as Liberty has most of her hair definition and the eagle' s thigh is sharper than most seen. Surface quality is attractive with minor scattered nicks from circulation. Only 19,800 struck, and today there are just over 100 known. **Pop 12; 71 finer at NGC.** (**PCGS # 7726**)
Estimated Value .....$1,500 - 1,600

Enlargement

1414 **1843-O. Small Date, Crosslet 4 PCGS graded Genuine Unc Details**. Filed Rims. A coin that looks like a MS-64 coin however the rims are filed. Frosty and still choice. (**PCGS # 7731**)
Estimated Value ..... $700 - 800

Enlargement

1415 **1843-O. Small date, crosslet 4. NGC graded AU-55.** Mostly untoned and rather well struck for the commonly seen weak issue. The obverse and reverse show scattered handling marks from circulation, but none are too deep. The mintmark is much larger on 1843-O quarter eagles than seen on the 1840-O or 1842-O coins, and this larger mintmark style continues in use after this year. The 1843-O is the most plentiful issue of the 1840s and these can be obtained in grades above the Choice Mint State level. Despite what the mintage implies, there are still likely fewer than 1,000 of these around today, a small sum when compared with many issues of the 19th Century. (**PCGS # 7731**)
Estimated Value ..... $550 - 600

Enlargement

1416 **1846-O. NGC graded AU-50.** CAC APPROVED. Mostly untoned with satiny golden hues throughout. The surfaces are pleasing, as there are minimal handling marks from brief circulation. Rather sharp for this notoriously weak issue, as all of Liberty' s curls are full, and only the left leg of the eagle shows minor softness along with his claw below. A tough coin in all grades, with perhaps 175 known today, few seen finer than a low end Mint State grade. Highly collectible and elusive when found this nice. Only 62,000 struck. (**PCGS # 7743**)
Estimated Value ..... $800 - 850

Enlargement

1417 **1852-O. NGC graded AU-55.** Untoned with bright reflective surfaces. Desipite its high mintage--relative to other 1852 branch mint coins, the 1852-O is quite a tough date to find in grades approaching mint state. This attractive AU-55 example should please most date and mint specialists. (**PCGS # 7766**)

$3 Gold

1428 **1854. NGC graded MS-62**. Lightly toned. Housed in an Old Style Holder. This is the first year of issue of this denomination, which continued in production through 1889. Always popular for the unusal stated value of $3, but this was based on a sheet of 3 cent stamps, which could be purchased 100 stamps at a time for $3 of course. Satiny luster in the fields and attractive for the grade assigned. (**PCGS # 7969**)
Estimated Value .....$1,800 - 1,900

1429 **1857. PCGS graded AU-50**. Only 20,891 minted.

Lovely Proof 1880 $3 Gold

Enlargement

1435 **1880**. **PCGS graded Proof 64**. Lovely light golden toning. Only 36 struck in proof of which perhaps 25 to 30 exist today. This is one of the finer examples with clasic orange peel texture in the fields and ample frost on the devices. The Indian headdress on Liberty is a classic design by famed mint engraver James B. Longacre which is paired with the open agricultural wreath on the reverse. However, the $3 denomination was finding little acceptance by 1880 so the mintage in Proofs was indeed quite tiny. Survivors are sparse and demand far exceeds the number available. An important example that should not be overlooked by specialists. **Pop 7; 1 finer in 65**. (**PCGS # 8044**)
Estimated Value ..... $18,000 - 19,000

Proof 1881 $3 Gold

Enlargement

1436 **1881**. **PCGS graded Proof 64 Deep Cameo PQ**. **CAC APPROVED**. This is a tough date with only 54 pieces minted, of which perhaps 50 survive. The majority of the known coins offer the regular contrast without the Cameo or Deep Cameo depth of contrast. Of the known proofs listed in the PCGS *Population Report* only five coins have the depth of contrast found here, and when the deep mirror fields are present these gold coins show exceptional eye appeal. The devices are all bathed in mint frost while the fields show amazing reflectivity. The effect of the Deep Cameo contrast is simply dazzling and mesmurising. Add to this the true rarity of this date and you have a totally winning combination. Don' t miss this opportunity if you have been seeking a high end coin. **Pop 2; 3 finer, 1 in 65, 2 in 66**. (**PCGS # 98045**)
Estimated Value $25,000-UP

Mint State 1885 $3 Gold

1437 **1885. NGC graded MS-62.** Light golden toning with reflective fields on both sides. Only 801 struck as demand for these coins continued to diminish. Here is an opportunity! **Pop 18; 31 finer, 1 in 62+, 10 in 63, 16 in 64, 4 in 65.** (**PCGS # 8007**)

$5 Capped Draped Bust

1807 $5 Capped Draped Bust. Bust Left

Enlargement

1438 **1807. Bust Left. PCGS graded MS-64 PQ.** CAC APPROVED. Boldly struck with reflective fields. Looks like a special strike as Liberty' s curls are so well formed and the eagle' s feathers are each fully struck. Notice too, the stars and lettering, each appears chisled into the coin by the immense force of the strike. This is the first year of issue of the new mint Engraver John Reich design, with Liberty facing left and sporting a soft cap on her head with LIBERTY inscribed on her headband. The obverse includes the date below, and thirteen stars surrounding the central device of Liberty. For the reverse design the legend encircles a proud standing eagle, with wings outstretched. Below the eagle is the denomination, expressed simply as 5 D. Above the eagle is the Motto E PLURIBUS UNUM on a raised ribbon. Reich the engranver was proud of his work, he had been hired by the Philadelphia Mint to improve the coinage designs. His first task were the two main backbones of coinage in commerce, the $5 gold piece and the 50 cent piece. He notably "signed" his dies by placing a small but deliberate "notch" in the outer point of the last star right of the date. In later years after Reich left the mint, his "notched" star sometimes appears again, but usually on all of the stars punched into the obverse die. These designe are both simple and elegant. Precious few of these survived at all, let alone in uncirculated grades, finding this first year of issue in near gem condition is quite remarkable! **Pop 22; 7 finer, 1 in 64+, 4 in 65, 1 in 67, and 1 in 67+.** (**PCGS # 8101**)

Handsome old crusty toning with dusky gold and orange tints throughout. These early half eagles were the primary backbone of large transactions during this era, half dollars served a major part in day to day transactions too. Not many survived from the original time of issue. Only 99,581 struck, and a minute fraction exist today, particularly in Mint State like the present coin. **Pop 3; 27 finer at PCGS.** (**PCGS # 8110**)

1444 **1849**. **NGC graded MS-60**. A nice untoned example. A few marks on the obverse as expected, but still a new coin and one that represents the year when the first of many waves of "49ers" left the east coast (and many other points) and flooded toward California to try their hands at prospecting for gold! The Eliasberg Gem Proof 1869 $5 Liberty

1446 **1869. NGC graded Proof 65 Star Cameo**. A wonderful coin with lovely light golden toning and fantastic eye appeal. The devices are bold throughout with glittering Cameo frost imparted by the dies while the mirror fields show the high degree of reflectivity one expects in an outstaning gem coin. However, this isn' t just any typical gem proof half eagle, this is an 1869. Only 25 minted, and while *CoinFacts* estimates the number known today at 20 this seems quite generous as PCGS records only 7 examples in all grades, five as regular Proof examples from PR-55 to PR-64, and two more with the Cameo designation, one as PR-64 and this coin as PR-65, the only gem seen by PCGS. The present offering is one of two seen by NGC at this grade level, but none are finer. It is notworthy that the other PR-64 PCGS Cameo example, while no doubt exceptional in its own right, does have a rather prodigious lintmark on the reverse, perhaps a strike through, which can be viewed on the *CoinFacts* website.

1869 was such an important year in history, one important fact on gold coins of this year involves President Grant. One of Grant' s shirt tail relations (Grant' s brother-in-law Abel Corbin) decided it would be useful to corner the gold market, and in the process make a whole lot of money. Corbin earned time with Grant and told him to withhold all the United States gold reserves and keep them off the market, then with this inside information Corbin and his co-conspirators (James Fisk and Jay Gould) bought up all the available gold on the market. Little was to be had as the monetary disruptions from the Civil War continued and most of the gold coinage remained in hoards. This drove up the premium of gold coins relative to the greenback dollars in circulation. Gold soon carried a 30% premium at market as to when Grant took office a few years before. The demand for gold forced the price to rise rapidly as others jumped on the bandwagon to easy profits. Meanwhile, President Grant learned of the scheme he had inadvertantly allowed, and pulled the plug by selling tons of Treasury gold into the market, roughly $4 million dollars worth. The premium of gold to greenbacks plummeted. Corbin was financially destroyed, but Gould and Fisk barely escaped the selling deluge. Investigations into the corruption were complex. In the end Grant survived in his presidency, but just barely. Looking at this Gem Cameo Proof eagle can often lead one into the immense history of the era, and the tidal forces that were ever changing the sandy coast of the politics of 1869. **Pop 2; none finer at NGC** . (**PCGS # 88464**)
Estimated Value ..... $45,000 - 50,000

Wonderful Mint State 1876

Enlargement

1447 **1876. PCGS graded MS-62+.** A choice frosty mint example. Only 40 to 50 examples are known to exist and this is one of the finer ones known today. The origianl mintage of 1,432 pieces suffered the usual indignities to the degree that such a small number remain. It is curious that so few were struck for the Centennial year of this country, as some other mintages were quite high for this particular year, others quite low. Demand for coins and production was still out of balance due to the Civil War, with paper money trading at a discount to gold until 1879. If you have been looking for an example of this prized date, especially a mint fresh uncirculated coin then look no further than this splendid example! **Pop 1; 8 finer.** (**PCGS # 8339**)
Estimated Value ..... $13,000 - 14,000

448 **1877. NGC graded AU-55.** A hint of tone with reflective surfaces on both sides on this rare and desirable date. The mintage came in at only 1,132 pieces struck. Most of those have long since disappeared leaving collectors struggling to find *any* example of this date and mint. Don' t miss out if you are a serious date collector! **Pop 4; 20 finer, 11 in 58, 3 in 58+, 1 in 60, 5 in 61.** (**PCGS # 8342**)
Estimated Value ..... $4,000 - 4,300

449 **1881-S. PCGS graded MS-63.** Well struck and totally brilliant. (**PCGS # 8357**)
Estimated Value ..... $450 - 500

1450 **1893. NGC graded MS-64+.** Well struck. (**PCGS # 8383**)
Estimated Value ..... $800 - 850

1451 **1901. PCGS graded MS-64.** Scarce this well preserved, with glowing luster and a solid strike. Best of all the devices and fields are quite clean, keeping the technical grade high along with the eye appeal. **Pop 368; 96 finer .**
Estimated Value ..... $650 - 700

Gem Proof Cameo 1903 $5 Liberty

Enlargement

1452 **1903. PCGS graded Proof 65+ Cameo.** A flashy white proof that has one minor copper speck on the reverse which is mentioned for identification. In the prior year the Mint introduced a more uniform proof style of an all mirror finish. That generally reduced the degree of frost on the devices and also reduced the number of Cameo coins. Only one Proof 1903 half eagle has the Ultra Cameo contrast, and precious few offer the desirable Cameo contrast. Finding this combination on a gem proof makes it even better. Only 154 minted. **Pop 1; 5 finer, 1 in 66, 2 in 67, 2 in 67+.** (**PCGS # 88498**)
Estimated Value ..... $25,000 - 27,000

Gem Proof 1903

Enlargement

1453 **1903. PCGS graded Proof 65 PQ.** CAC APPROVED. Fully white gem example. Only 154 minted and this is one of the finest seen of the Proofs. The Mint changed the process for preparing the dies to make Proofs in 1902, reducing the depth of frost on the devices and producing more of an all mirror effect for the entire coin. This is an example of that revision, and these are rare in all grades, especially so in Gem. Appealing and important! **Pop 4; 3 finer, 2 in 66, 1 in 67.** (**PCGS # 8498**)
Estimated Value ..... $23,000 - 24,000

1454 **1904. PCGS graded MS-65.** Well struck with a hint of light gold tone and incredible originality. Exceptional satin luster and amazing quality surfaces for any date half eagle. One of the finer pieces as noted of this date. **Pop 69; 26 finer** . (**PCGS # 8409**)

1461 **1910. PCGS graded Proof 64.** A gorgeous brilliant yellow gold satin finish matte proof example. Free from spots and any decernible marks. In our opinion a **Premium Quality** example for the given grade. Only 250 proofs struck and an estimated 73 examples exist, and it would appear that perhaps some these proofs were later melted as unsold as the survival rate is much lower than normally encountered for a 20th Century proof issue. Regardless of the number known, this is an exceptionally beautiful example! **Pop 13; 12 finer.** (**PCGS # 8541**)

1468 **1850. Small date. NGC graded AU-50**. Mostly untoned with average surfaces for the grade. The Small Date variation is much scarcer than the Large Date of this year and was created when the date logotype intended for half eagles was employed on this eagle die. Date digits this small had not been seen on eagles since 1842, making this issue really stand out. **Pop 15; 71 finer. (PCGS # 8604)**
Estimated Value .....$1,200 - 1,250

1469 **1856. NGC graded AU-58. CAC APPROVED**. A nice strike and scarce this well preserved. The vast majority seen fall into far lower technical grade categories of this date. This is a desirable example of the No Motto style. (**PCGS # 8619**)

A lovely coin which dazzles the eye and is one of the fantastic early proofs of this series. Although 25 were minted it is estimated that 10 or 11 are known today, some of which are impounded. This example offers bold visual contrast with the Deep Cameo designation, the highest degree of contrast known. PCGS has only graded 3 examples with the Deep Cameo designation, and this is one of them. The grade approaches the gem level, and the surfaces are quite pleasing. 1907 High Relief, Wire Rim

Enlargement

1517 **1907. High Relief, Roman Numerals, Wire Rim. PCGS graded MS-64 PQ.** CAC APPROVED. Housed in an Old Green Holder and one of the great classics of the Saint-Gaudens series. These are the closet to the original concept of the great artist Augustus Saint-Gaudens that most collectors can pursue as the Ultra High Relief coins are well beyond all but the largest numismatic budgets. Finding a near gem like this is truly a delight, with its radiant luster, incredible three dimensional devices and nearly an ounce of gold in heft, creates a winning combination that simply has never been topped by any other coin design in the opinion of many numismatists. Outstanding surfaces, rich gold color and of course the towering strike all combine to make a memorable coin, especially when found this nice. (**PCGS # 9135**)

The fields and devices are much nicer than one expects to find for the grade assigned, as even a few stray marks tend to discount the grade quickly on these High Relief coins. Of crourse the strike is bold throughout, right up to the eagle' s wing edge and Liberty' s raised knee. Deserving to be our most popular coin ever struck, not only for its evident beauty but for its epic struggle to be produced at all. If you have always wanted to own one of these, this auction provides you with an opportunity to pick up a majestic example with a variety of grades to choose from. (**PCGS # 9136**)

Lovely 1914 $20 St. Gaudens

1529 **1914**. **NGC graded MS-65**. Well struck and very frosty and this is one of the very finest known. Surpassed by a single coin as MS-66 and one with the NGC star for eye appea at the same grade levell, that makes the present offering well worth notice and an exceptional bid. While the world was focused on the unfolding war in Europe, this double eagle was struck and carefully preserved, unlike virtually every other example struck in 1914 of this denomination. An outstanding coin for the specialist. Only 95,250 struck. **Pop 29; 2 finer, 1 in 65 Star, 1 in 66.** (**PCGS # 9164**)
Estimated Value .....$12,000 - 13,000

1530 **1914**. **PCGS graded MS-64 PQ.** CAC APPROVED. A hint of light golden tone. Merely 11,166 examples are estimated to have survived and while scarce this night, this issue is quite challenging to find even a single grade point finer. It is curious that the Philadelphia Mint production for this issue was so low, only 95,250 pieces, yet the Denver and San Francisco branch mints multiples of this figure in 1914. This must have been the result of regional demand being far higher where those mints are located, while demand from the east must have been slow tha year. **Pop 464; 82 finer** . (**PCGS # 9164**)
Estimated Value .....$4,500 - 5,000

1531 **1914-D**. **PCGS graded MS-65**. Subtle golden coloration delicately covers both sides of this gem example. A lovely coin that is characterized by booming luster and flashy surfaces. (**PCGS # 9165**)
Estimated Value .....$2,500 - 2,600

1532 **1914-D XF**. Cleaned.
Estimated Value .....$1,000 - 1,050

1533 **1915-S**. **PCGS graded MS-65**. Incredible multi colored toning dazzles the viewer on first glance. This flashy gem is very attractive and appears to practically jump out of the holder with its blazing luster and regal appearance. Although plentiful at this grade level this date and mint is seldom found much finer than seen here. (**PCGS # 9168**)
Estimated Value .....$1,900 - 2,000

1534 **1916-S**. **PCGS graded MS-62**. Mostly untoned. (**PCGS # 9169**)
Estimated Value ..... $1,050 - 1,100

Rare 1920-S $20 St. Gaudens

Enlargement

1535 **1920-S**. **PCGS graded MS-62**. The original mintage 558,000 has little revelance today, perhaps 150 pieces remain today to represent this date and mint. That makes this one of the rarest dates and mints of the entire Saint-Gaudens series, and this lovely Mint State coin will please any collector. Furthermore, roughly half of the known coins are in circulated grades, as these served time in circulation for years before being saved. A towering example of this key date that should not be missed. Mostly untoned with a few trivial specks but otherwise bathed in rich mint luster. **Pop 15; 31 finer** . (**PCGS # 9171**)
Estimated Value ..... $50,000 - 55,000

1536 **1922**. **PCGS graded MS-65**. A very nice looking coin and while available at this gem level, precious few are seen any finer of this date and mint. An impressive example for the date or type collector. (**PCGS # 9173**)
Estimated Value .....$4,000 - 4,400

1537 **1923**. **PCGS graded MS-64**. Handsome quality and close to the gem level.
Estimated Value .....$1,200 - 1,250

1538 **1923-D**. **PCGS graded MS-66**. A nice untoned example. (**PCGS # 9176**)
Estimated Value .....$1,900 - 2,000

1539 **1924**. **PCGS graded MS-64**. Flashy luster and pleasing coppery iridescence.

1540 **1924**. **PCGS graded MS-63**. A nice frosty coin mostly untoned. (**PCGS # 9177**)
Estimated Value .....$1,200 - 1,250

Rare 1924-S $20 St. Gaudens

1541 **1924-S. PCGS graded MS-63 PQ.** CAC APPROVED. This is one of the key dates to the Saint-Gaudens series as virtually all of the original mintage of nearly 3 million pieces was melted in the early to mid 1930s when gold coins were called in and melted into gold bars to be stored in Fort Knox. Furthermore, unlike many other dates, no vast quantity of these 1924-S double eagles made it over to Europe to escape this mass melting. Dates in the 1920s were particularly affected to the degree that in the 1940s it was believed that only a few examples existed of the 1924-S. In fact this date was considered the rarest Saint-Gaudens double eagle for many years, before the 1927-D won that battle as virtually no examples were found in Europe, along with the 1933 of course. Finally, in the 1960s a few 1924-S double eagles showed up in European hoards, and today this source has been the only real supplier of this issue. Nevertheless, fewer than 1,000 exist and almost all of these coins from Europe show considerable bagmarks, greatly limiting the grade. Choice examples like this are scarce but availble for a price. Key dates like this will likely remain so as most of the gold has now been gone through from Europe and this fetile field has been largerly harvested. An opportunity for the date collector! (**PCGS # 9179**)
Estimated Value .....$10,000 - 11,000

1542 **1927. PCGS graded MS-64.** A few copper specks but with ample luster and attractive.

1544 **1932. PCGS graded MS-65**. A frosty untoned coin with over 1 million minted, but virtually all were melted, leaving fewer than 100 of these today. This is one of the key dates to the series of Saint-Gaudens which is seldom offered, especially this nice. With the 1933 double eagles still under litigation and likely to be off the market going forward, this is the last obtainable date for most collectors. An opportunity for the astute numismatist.

In early 1933 President Roosevelt called in all the gold coins, with exceptions allowed for coin collectors. Naturally there was no premium on a coin like the 1932 double eagle, which seemed to be widely available. Add to this the fact that few collectors could afford to put away a $20 coin even at face value. Thus the vast majority of these were lost to the melting pot, leaving precious few for collectors today. An exceptional opportunity! **Pop 32; 12 finer, 1 in 65+, 10 in 66, 1 in 66+. (PCGS # 9194)**
Estimated Value ..... $75,000 - 80,000

1556 **1881. PCGS graded Proof 66 Cameo.** CAC APPROVED. A marvelous proof example that warrants a strong bid for it' s originality, rarity, and eye appeal. Notice the Cameo contrast with the orange peel effect in the fields that produces a wonderful depth of reflectivity, combined with the seductive frost on all the devices. Only 54 pieces were coined in the Proof format, 54 for the entire year. How many of those exist today? Possibly as many as 50 pieces, but this is doubtful as most such early Proofs suffered at least 20 percent of the issue being lost or spent. There are at least a few that are known to have been spent and circulated from this paltry beginning. There are some trivial light specks on the reverse, common to these early gold Proofs, which are not at all destracting and can aid in tracing prior auction appearances. Certain to delight any specialist of this series, and one of the very finest Cameo coins of this date. There are no more than a few Deep Cameo coins to represent this issue as well, thus the desirability factor is high for this handsome piece. **Pop 2; 1 finer in 67 Cameo.** (**PCGS # 88045**)

Add to this the Cameo contrast and you have a determined winner here that will dominate any competition. Of the orignal mintage of 42 pieces it appears that no more than 15 to 20 exist today. This one is far and away the finest seen by PCGS (in all designations), but is tied with one other seen by NGC. Clearly there was quite a high attrition rate on these early gold proofs than is generally known. If you have been seeking a high end Superb Gem with Cameo contrast, your choices are quite limited, so bid accordingly if you hope to capture this captivating coin. **Pop 1; none finer at PCGS. Cameo Proof 1881 $10

Enlargement

1558 **1881. PCGS graded Proof 64 Cameo. CAC APPROVED.** A trace of vivid gold and copper toning can be seen on both sides attesting to the wholesome originality of this monumental rarity. The orignal mintage of 40 pieces has been reduced by time, attrition and various economic troubles to perhasp as few as 10 coins today. One exists in the Ultra Cameo designation seen by NGC and another ealry strike with this contrast resides at the Smithsonian. However, the focus here was to find the most exquisite Cameo designated Proof of each date certified by PCGS, and here is the perfect coin. It is by far the finest of two graded with the Cameo designation by PCGS, the other being a distant PR-61 Cameo. Notice the regal orange peel texture in the fields, and how the fields seem to fall away from the frosted devices when examined. Such contrast is so compelling to view, it makes any numismatist desire to study the surfaces for hours. At the time these 1881 gold eagles were struck, they represented a considerable sum of money, even for the wealthy, thus most were eventually spent as hard times came and went, and no doubt the majority of these proofs were lost due to unfortunate circumstances of their initial owners. Today, those that do survive have become far more valuable and desirable. **Pop 1; none finer at PCGS** . (**PCGS # 88821**)

Deep Cameo Gem Proof 1881 $20

1559 **1881**. **PCGS graded Proof 65 Deep Cameo**. A phenomenal Deep Cameo Proof Double Eagle. This magnificent Gem captures the viewer' s attention immediately. The magnificent eye appeal is enhanced beautifully by radiant golden toning. Soothing shades of sunset golden orange blanket both sides. The original minatege came in on the high side at 61 pieces, however; today there are no more than 20 pieces known. Remarkably, there are *no Cameo examples currently certified by PCGS* so a Deep Cameo example was obtained for this breathtaking 1881 proof set. As far as the unusal cluster of Gem Proof-65 Deep Cameo coins it is possible that some duplication exists in that number graded, but research will be fruitful in trackng down how many exist based on the number of auction appearances over the generations. Not only is this a rarity in all proof grades, but circulation strikes were limited to 2,199 pieces of which abput 40 to 60 exist today. Virtually all of these were found in overseas hoards and returned to our shores in the last couple of generations. Of course Proof examples are the most desirable, and here is one of the absolute finest examples to exist. To have the opportunity to purchase of coin of this incredible quality is exceedingly rare. We note a shiny area on Liberty' s upper lip and chin as made, mentioned for identification purposes. **Pop 5; none finer at PCGS** . (**PCGS # 99097**)

AN IMPORTANT COLLECTION OF US GOLD FROM A PROMINENT MIDWESTERN FAMILY

Gem 1881 Cameo Proof $2.50 Liberty

1579

1881. PCGS graded Proof 66 Cameo PQ. CAC Approved. Here is a fantastic Gem Cameo Proof Liberty quarter eagle. Not only is this a prized rarity in Proof, but circulation strikes were limited to a mere 640 pieces for the year, making any appearance of an 1881 quarter eagle quie an event. Only 51 minted in the Proof format, and this is one of the absolute finest. Boldly struck and nearly perfect in quality, with rich golden hues throughout and no distracting handling marks or hairlines of any consequence. These early Liberty quarter eagles are beautiful when found in Gem grades, and add to this mix the gorgeous Cameo contrast and you have an exceptionally appealing coin. This prize is destined to be a major centerpiece in any advanced collection.

The overall mintage for this date was tiny as demand fell way off for new coins in this era. This was caused by countless hoards of coins coming back into circulation beginning in 1879 and later as the United States finally worked through the monetary indigestion that developed during the Civil War. As the storm clouds of war gathered and burst into rage in 1861, coins of all sorts were hoarded as precious metal coins might be later needed for the most important transactions, and the uncertainty of the time meant that the usual gold and silver coins might not be available. As the population panicked over the spectre of war, the coins in circulation disappeared into hoards. Soon a variety of coinage substitutes were flooding the channels of commerce, fractional currency, Civil War tokens, new paper currency known as Greenbacks and other types of circulating medium were created to replace the hoarded gold and silver coins. Gold could still be purchased as the war unfolded, but at an increasing premium to the paper dollars that soon became the primary circulating medium. Gold continued to trade well above the stated "par" value (of the paper dollar) well after the Civil War ended, and many years later—in fact not until 1879 did the premium finally disappear between the value of gold coins and paper dollars. Thus the hoarded gold (and silver) coins came back into circulation as the uncertainty and premium for metal over paper, had passed. So many coins returned to circulation, that they flooded into the Post Offices and other government facilities, and demand for new coins from the mints collapsed. An important offering for the astute numismatist. **Pop 2; none finer. Tied for the finest at either grading service with the Cameo contrast. (PCGS # 87907)**

This is one of the classic rarities of the entire gold production by our country. Only 425 minted, and these "Stellas" have been sought after since the day they were struck by collectors far and wide. First off the denomination certainly did not "fit" into our decimal system very well, and the value of $4 was very close to the well established $5 half eagle.

The concept of the $4 Stella was for a trade coin that would circulate internationally. Engraver Charles E. Barber designed the Flowing Hair dies while the Coiled Hair dies were engraved by George T. Morgan. Few collectors have a chance to own one of the $4 coins because of their lofty value, and the present example will certainly please one lucky bidder who finally gets to show off this prized rarity after winning it in our auction. Worn as jewelry a long time ago but the surfaces are generally attractive. Light golden toning and appealing.

This particular Stella offers possible confirmation of the widely reported use of Stellas by Congressmen to pay for certain favors from the madames of the popular bordellos in the Washington DC area. Walter Breen, in his Encyclopedia noted that collectors of 1879 could never obtain a Stella from the Mint Bureau, but congressmen could order and receive these handsome coins which soon became favorites of the madams, and many were looped for wearing in a necklace. Perhaps this is one of these famous pieces, which worked its way back into the numismatic marketplace! Oh the stories it could tell **(PCGS # 8057)**

Deep Cameo Proof 1866 $5 Liberty. With Motto

1582

1866. With Motto. PCGS graded Proof 66 Deep Cameo PQ. CAC Approved. This is an incredibly rare Proof coin, not just in absolute terms of the small number known, but for its stunning quality. Only 30 minted in Proof and this is undoubtedly as nice as this issue can be found. The strike is precise and absolute, with every curl on Liberty's head and central star line bold. Matching quality on the reverse with each feather of the eagle, and surrounding letters fully formed and frosty against the deeply mirrored fields. Rich but light golden toning is found on the obverse and reverse.

The depth of the contrast between the fields and devices confirms this was an early strike when the dies were able to impart the greatest Cameo contrast, and this is the most desirable and dramatic designation available on a Proof gold coin. Add to this fact that the issue of 1866 was the first to display the new Motto of IN GOD WE TRUST on the reverse, and the impecible quality and you have a sure winner. From a point in history, 1866 was the first year of peace after the devastating Civil War which ravaged many of the Southern, Eastern and Central states of this country. Rebuilding and recovery would take more than a generation, particularly in the South. Hence, few collectors were focused on obtaining and keeping such a coin, and based on the certification data at least a few of these 1866 Proof half eagles entered circulation for a time. Thus finding one so exceptional is truly an event.

The combination of the PCGS and NGC data yields no more than 14 individual specimens (4 of which are mishandled Proofs with circulation evidence!), and it is virtually certain that some duplication exists between thoee numbers. Two other exampless are impounded, one at the Smithsonian, another at the ANS, leaving perhaps 8-12 pieces that are available to collectors today. Examples of this issue are seldom available, with auction data showing a five or six year span between offerings of this rarity. Thus, any collector with a desire to own an example of this date had best step up to the plate and be ready to battle other bidders to capture this memorable Gem! **Pop 1; none finer. Gem Deep Cameo Proof 1899 $5 Liberty

1583
1899. PCGS graded Proof 65+DCAM. CAC Approved. Only 99 minted of which perhaps 50 to 70 exist today. This is one of the most stunning, well preserved examples we've seen in decades! The depth of contrast is perfectly matched against the backdrop of undisturbed fields and needle sharp devices. Every nuance of the die is bold, with each star, digit and device fully frosted by the dies, while the surrounding fields offer the bold mirroring expected. A flashy white gem proof with just a hint of copper blush when closely examined. **Pop 2; 4 finer (PCGS # 98494)**

Wonderful Gem Unc 1909-O $5 Indian

1589

1909-O. PCGS graded MS-65 PQ. CAC Approved. Only 34,200 minted of which merely 1,416 examples are estimated to have survived by CoinFacts, this number likely generous as that represents nearly five percent of the original mintage. The vast majority were melted long ago, and clearly not many were saved at the time of issue. Mint State pieces are few and far between among those known, and gems are exceptionally rare. In point of fact, this coin is tied with one other as the second finest available to collectore, the finest being the Eliasberg-Price-O'Neal example at PCGS MS-66 crowned "The Coin" by David Akers. That slightly finer example commanded $646,250 the last time it sold in 2014. There is one that could grade MS-65+ held in the Smithsonian which is permanently off the market, and next in line comes this example and the Duckor coin as solid gems. NGC has graded two coins as high as MS-65 of this date but it is not known if these are different examples or not from those noted in the PCGS Population Report. Frosty and boldly struck with coruscating luster throughout. Sharp struck mint mark. A wonderful key date that represents the final year of production for the New Orleans Mint, and one of the most coveted gold issues from this era. There simply was not enough gold flowing into the New Oleans area, or silver for that matter, to warrant keeping this branch mint open. As a matter of economy and redundancy, the determination was made to shutter the New Orleans Mint at least for that time, which has since become a permanent situation. Hence, this is one of the last coins struck at this historic mint, and one of the most sought after of the Indian half eagle series. **Pop 2; 1 finer in 66 (PCGS # 8515)**

1909-S. PCGS graded MS-63. Well struck with lovely golden toning. Although this date and mint appears to have a sufficient mintage of 297,200 pieces, nearly all those that survived are circulated. Gem 1910-D $5 Indian

1592
1910-D. PCGS graded MS-65 PQ CAC Approved **Gold Sticker.** Well struck with lovely rich golden toning. A coin that should be regraded. At present, PCGS has graded a scant 5 examples as MS-66 or finer of this date and this coin clearly should be elevated to that lofty position as MS-66 or finer. The surfaces are alive with mint luster and show virtually no signs of bag handling. The strike is bold for this scrace date. Only 193,600 pieces were struck and this is one of the finest known today. With the splendid orange-gold color throughout, the total originality of this majectic piece is beyond question. An absolutely amazing coin and destined for one of the finest collections of this series.

It is important here to note what an unusual coin this is to have earned a Gold CAC sticker. For the entire Indian half eagle series, a total of 12 coins have been awarded a Gold CAC sticker, each of these after careful consideration of being undergraded by a full grade point. As CAC does not recognize the "+" grade that implies they believe the current coin to be at least MS-66. As the finest seen of this date is MS-67, this coin becomes one of the top half dozen known. Furthermore, of the 12 gold stickers issued by CAC on this particular series (for both PCGS and NGC coins) all them fall into the grade category of AU-55 to MS-62 where an additional grade point is not always that important to achieve. On this incredible condition rarity, a single grade point means a tremendous amount of value and a huge notch up into the Condition Census for this prized issue. **Pop 7; 6 finer (PCGS # 8518)**

Among The Finest 1910-S $5 Indian

1593
1910-S. PCGS graded MS-65+PQ. CAC Approved. Here is a majestic gem of this prized date and mint, which is frosty and untoned. This great coin has it all, and offers not only incredible condition, but incredible rarity as well. Alone at this lofty grade of MS-65 and topped only by a single coin which is graded MS-66 by PCGS, making this piece likely the second finest 1910-S half eagle to exist. The mint bloom is breathtaking and the surfaces are amazing to behold. They are so well preserved, and free of handling issues that normally plague even common dates in gem condition—not so here, all is fresh, vibrant and attractive. Survivors of this San Francisco issue are downright scarce, especially with any decent grade to them, the only sort of available grade for most collectors is MS-62, and those still require quite a premium to acquire. Most of the known survivors fall into the high AU grades or top out at MS-61 for the 1910-S half eagle. If you want a high end gem, and one with CAC approval, this is the only, and finest, coin to buy. **Pop 1; 1 finer in 66 (PCGS # 8519)**

AN IMPORTANT COLLECTION OF US GOLD FROM A PROMINENT MIDWESTERN FAMILY

Gorgeous 1911-D $5 Indian

1595

1911-D. PCGS graded MS-64+. CAC Approved. Well struck and frosty. Only 72,500 minted of which merely 2,166 examples are estimated to have survived, and nearly 90 percent of those survivors are in circulated grades. While the mintage of this date and mint was certainly low when compared with other dates and mints, its what happened to the coins that varies. For unknown reasons virtually all of the 1911-D half eagles entered circulation, and most stayed there for a time. Naturally the majority of those struck were melted down in the gold coin call in of 1933, and subsequently melted by the authorities. Thus for collectors, finding any example of this date and mint in Mint State requires patience and wherewithal. Today, this historic offering has come out of the woodwork so to speak, from a collection that was put together long ago by a most astute numismatist. Today this coin—which has been off the market for two or more generations—is considered the third finest of the date as certified by PCGS. NGC has two others that grade MS-65, but none finer at that grading service. In point of fact, of the PCGS coins reported, only the famous O'Neal coin and Simpson coin are considered marginally finer.

While the Denver Mint produced three scarce gold coins in 1911, the Indian quarter eagle is the most famous as it is the only real standout rarity of the Indian quarter eagle series, and the well known key to that set. The Indian eagle is also scarce in its own right, while the Saint-Gaudens double eagle is downright common for this year. The Indian half eagle would seem to be plentiful enough given the number produced but this is only true in circulated grades. Even in low end Mint State grades this is a tough date to find. The 1911-D half eagle is known for below average luster and often is found with abraded surfaces, limiting the grade and of course, the eye appeal. Hence, this gorgeous, high end coin on the cusp of the gem level comes highly recommended! Make sure to view is stunning charms before the auction and bid accordingly if you expect to capture this prize. **Pop 1; 2 finer, 1 in 65, 1 in 65+ (PCGS # 8521)**

Lovely 1912-S $5 Indian

1598
1912-S. PCGS graded MS-63 PQ. CAC Approved. Very frosty with outstanding surfaces for the choice grade assigned and tough date and mint to find this nice. For some reason these early mintmarked half eagles seem to have suffered a similar fate. Depsite a generous mintage, less than one percent survived at all, and of the few thousand that did survive only a modest number qualify in Mint State condition. Naturally the majorty of mint state coins are in lower grades, with the numbers seen in Choice including this coin coming in at a low tally of 15 pieces. Finer pieces are downright rare, numbering 20 in MS-64 with just a single coin in MS-65 at the top of the PCGS Population Report. This particular San Francisco issue is known for its weakly struck mintmark and generally inferior strikes, which combine to make this date so diffucult to find in choice grades or finer. If you have been looking for a highly appealing and attractive 1912-S half eagle, then bid high in order to capture this stellar representative of this date. **Pop 15; 21 finer, 20 in 64, 1 in 65 (PCGS # 8524)**

Probably The Finest 1914-S $5 Indian

1603

1914-S. PCGS graded MS-65 PQ. CAC Approved. This coin is tied with the famous Dr. Steven Duckor example that is now in the Simpson Collection. Although the mintage of 263,000 pieces implies likely availability, this is true only up to the MS-62 grade range. And most of these lower end mint state coins offer subdued luster and abraded surfaces, as expected. At the choice grade level the 1914-S half eagle is a true challenge with sparse numbers seen and values approaching five figures. Finer coins are downright rare, with PCGS noting a scant 6 pieces as MS-64, and a single MS-64+ in their Population Report. For many years only the Duckor coin appeared to achieve the gem level, until this splendid coin was submitted recently. Its staggering quality and glowing mint color earned its rightful place as a tie to the Duckor gem. Now pictured on the CoinFacts website to represent this issue, collectors far and wide can view the wonders of this jewel. NGC has similarly graded 6 examples as MS-64, but only a single example of this date and mint as MS-65. None are finer. Rich golden toning which both dazzles the eye and radiates the golden iridescence of the surfaces. Boldly struck throughout, and carefully preserved. The exceptional appeal of this coin makes us wonder if it was not set aside at the time of issue, as it so clearly stands head and shoulders above virtually all other known pieces. If you desire the finest, then here is a coin to make sure to win.

In the Encyclopedia of U.S. Gold Coins 1795 - 1833 by Jeff Garrett and Ron Guth this date is described as follows "Thus, the 1914-S has earned its place as the most difficult and rarest issue of the series to find in MS-64 or higher grades. This date should be considered the key date to the series." With only two PCGS gem coins known, one of which is tied up the Simpson Collection, it may well be a long while until another opportunity arises to obtain a gem of the 1914-S. Hence, if you desire the best, then the time to act is upon you. **Pop 2; none finer. Tied for the finest at either grading service (PCGS # 8529)**

Lovely 1915-S $5 Indian

1605
1915-S. PCGS graded MS-63 PQ. CAC Approved. Well struck with lovely golden toning. This is one of the tougher dates to find at all from this popular series, but thankfully for collecters sake there are a decent number of MS-63 coins available, finer coins are downright expensive and rare, and PCGS has yet to grade a single example as MS-65 of this date and mint, although NGC has graded one coin that high, but none finer. This coin offered is a premium example that boasts great luster and abundant eye appeal, and is destined for an advanced collection of Indian half eagles. **Pop 44; 11 finer, 9 in 64, 2 in 64+ (PCGS # 8531)**

1606
1916-S. PCGS graded MS-62 PQ. CAC Approved. Softly struck mint mark as sometimes seen on this date and mint. Nicely toned and quite frosty for the issue, with nice surfaces for the grade assigned. Only 240,000 pieces were struck and while this issue is known to exist in mint state, a good many of the examples seen today came from a hoard of approximately 200 pieces which surfaced, and according to David Akers, none from that hoard exceeded MS-63 quality. Half eagle production went silent after these were released until 1929 when Indian half eagles were again produced **(PCGS # 8532)**

Tied For Finest 1929 $5 Indian

1607

1929. PCGS graded MS-65. The 1929 half eagle is the final year of production for the Indian half eagle series. These have always been a popular key date, despite the generous mintage of 662,000 pieces, the vast majority were melted soon after they were released, and most were likely gathered up from banks as the Depression of 1929 started to really dig in. Few people could afford to hold onto a $5 coin as it represented a weeks wages for many people in that era. Today there are probably close to 800 of these that exist, most fall well short of the quality here despite being in Mint State, they wre not gently handled and many suffer from the expected cuts and nicks of bag transport. Gems have always been precious and few, with PCGS noting only 10 at that level in their Population Report. Importantly, there are none finer at either major grading service. It had been a dozen years since the last half eagle was struck for circulation in 1916, and thankfully for collectors more were produced in 1929, little knowing at the time that these 1929 coins would be final half eagles produced of this series. Frosty and well struck. **Pop 10; none finer. Tied for the finest at either grading service (PCGS # 8533)**

Among The Finest 1866 $10 Liberty. With Motto

1608

1866. With Motto. PCGS graded Proof 65 Deep Cameo PQ. CAC Approved. This is an historic opportunity to purchase one of the finer examples of this prized rarity. After all, only 30 were minted in the Proof format and from that original issue no more than 10-12 survive today. One is impounded in the Smithsonian, that being a lovely PR-63 Cameo example that was obtained in the year of issue for the National Numismatic Collection.

The auction record for this particular date offers some insight into its rarity, a similarly graded PCGS PR-65 was sold in August of 2007 for $138,000 with a notation in the catalog that the coin clearly had Deep Cameo contrast by the then current standards but was housed in an older generation PCGS holder issued prior to the use of this designation by that grading service on gold Proofs. Today it is possible that coin is now one of the other PCGS PR65 Deep Cameo or PCGS PR66 Deep Cameo examples that are reported in their Census but there are no auction records in either grade. The present coin being offered does not appear to have been auctioned in the last 25 years from a review of all recorded sales noted in CoinFacts. There are currently 15 grading events recorded between the combined data of PCGS and NGC for Proof 1866 Eagles, with duplication almost certain in those numbers. One of these is impaired at Proof 53, and when examined most examples exhibit either Cameo or Deep Cameo contrast. It would seem likely that not more than 10 examples are available to the collecting public of this date in Proof.

1866 saw the introduction of the Motto on the reverse which states IN GOD WE TRUST placed on a raised ribbon above the eagle. This Motto was adopted to all coins large enough to display it. Thus, this is the first year of a new type, which adds to the appeal. These were also struck right after the Civil War had ended, and collector orders were low in that bleak time. While the data records two or three coins that are PR66 it is not known if these represent one, two or possibly three coins. Further research will resolve this mystery in time as photographs of the known pieces are available when they are sold publicly. The present coin is clearly a very high end example, and a coin which deserves a strong price for its elegant quality and pristine surfaces. For future identification there is a tiny speck below the second star and a short curved lint mark nearly touching the upper serif of the 1. Boldly struck and untoned. **Pop 2; 1 finer in 66 (PCGS # 98806)**

Super Gem 1899 $10 Liberty

1609
1899. PCGS graded Proof 66+DCAM PQ. CAC Approved. Boldly struck and fully brilliant with no detracting spots. This proof rarity offers splendid contrast, incredible frost on the devices and pristine surfaces that offer bold reflectivity. There are likely 50 to 70 known today from only 86 minted. This outstanding coin is nudging ever so close to the finest graded by PCGS, and one that has earned the ultimate contrast designation. There is a tiny cluster of three pieces graded this high, with just two seen a notch finer of this date. The surfaces glitter with reflectivity and contrasting frost on the undisturebed devices. These late 19th Century proofs were some of the finest quality coins struck at the Philadelphia Mint, and remain a pinnacle of production which would be difficult to surpass even today. **Pop 3; 2 finer in 67 (PCGS # 98839)**

Lovely 1907 $10 Indian. Wire Rim, Periods

1610

1907. Wire Rim. PCGS graded MS-64+. CAC Approved. This is the design that is closest to the original concept of the designer Augustus Saint-Gaudens intentions. Known technically as Judd-1774, these are actually patterns, but were produced in sufficient numbers (like the $4 gold Stellas) so they are widely collected today as part of the regular series of Indian Eagles. However, after striking and examining these 500 coins, it became obvious to mint officials that they would not stack properly in a uniform fashion, which is a requirement for modern coinage of the 20th Century. Thus, some modifications had to be taken to reduce the Wire Edge feature and give these coins some kind of defined rim, which would allow for proper stacking. Although the original mintage was not recorded, a letter from Henry Chapman to John Garrett from 1908 provides the mintage of 500 pieces, a number which is borne out in the population data seen today and is likely close to the mark as Chapman had many close ties with the Philadelphia Mint. Most of the examples known are considered Uncirculated (althougn these patterns should be considered Proofs), although a few apparently slipped into circulation for a time. Ownership of an example is simply required for any serious numismatist of this series, and these represent an integral part of the transformation from the concept of Augustus Saint-Gaudens to circulating coinage by the end of 1907.

Saint-Gaudens wanted a simple, elegant design for the eagle and double eagle. He reserved the full striding figure of Liberty for the larger $20 coin. Thus, a classical bust of Liberty would be required for the $10 coin, at the virtual demand of his friend and confidant President "Teddy" Roosevelt, an Indian headdress was included on Liberty's head, neither logical nor realistic, but a requirement nonetheless to appease the powers that be. The obverse design was elegant and simple; thirteen stars were placed as rim fortifications along the upper half of the obverse, the only letters were a small LIBERTY placed on her war bonnet. The date 1907 is located below her truncation.

The reverse design is somewhat crowded by the requirements of the day, a standing eagle stares fixedly to the left, above is UNITED STATES OF AMERICA, behind the eagle's back is E PLURIBUS UNUM and below is TEN DOLLARS. Tiny mintmarks, when applied, reside to the left of TEN. The only remotely open space on the coin is before the eagle's proud breast, which soon became the location of the Motto in 1908! Nevertheless, these elegant coins remain one of the most popular designs struck for circulation, and holding one of these in your hand gives one a glimpse into the greatness of that era.

While not the absolute finest from a technical grading perspective, the quality here nudges close to the gem level, and this historic and handsome coin will always represent a fleeting peek of the granduer of the Roosevelt era. Rich golden toning. Only 500 minted. **Pop 3; 90 finer (PCGS # 8850)**

Gem 1907 $10 Indian. Rounded Rim, Periods

1611

1907. Rolled Edge. PCGS graded MS-65+ PQ. CAC Approved. This is one of the great rarities of the 20th Century. After the stacking failure of the 1907 Wire Edge coins this revised design was implemented, employing the same triangular stops before and after the words on the reverse, with the inclusion of a thick rim at the edge of both dies, allowing for better stacking. However, after a rather large mintage of between 20,000 and 34,100 pieces, production was halted. Mint Engraver Charles E. Barber did not like this design and pointed to the fact that certain areas tended to not strike up well, notably the hair over Liberty's ear and portions of the eagle's wing and trailing leg and claw. Mint Director Frank Leach agreed with Supeintendent John H. Landis that these coins did not meet their quality standards and ordered them melted. Only 42 pieces were released. Charles E. Barber then set to task to stengthen certain areas of the master hubs and place his own stamp on Saint-Gaudens work. Barber strengthened the feather ends, omitted the triangular dots, moved one of Liberty's curls to encroach the IBE of LIBERTY and altered the shape of the branch in the eagle's claw. Although the result was sharper feather ends, the central features continued to show softness on both Liberty and the eagle once the Barber revisions went into production.

For many years these Rolled Edge coins were considered a pattern issue (J-1775), but with the prodigious mintage and intention for circulation, these technically were not patterns at all but simply an intial production run which was found to not meet up to standards. In due course these coins were not generally released to the public or circulation. Many examples exist of abrupt changes to initial coin designs, especially when the conceptual designs were created by artists from outside the Mint. Professional jealousies run deep, and most of the Mint's employees don't favor outsiders designing coins. Furthermore, the practical issues of coin design often get in the way of concepts, such things as how well a coin functions in a vending machine often cause heartaches for designers and modifications to artistic concepts. Examples include Christian Gobrecht's initial design of the half dime and dime of 1837 without obverse stars, the Drapery issues of the next few years, the 1913 Buffalo nickel which was changed midyear to stand on more defined and solid ground, the 1921 Peace dollar in high relief which was modified. Needless to say the Standing Liberty quarter had more than its share of changes to its 15 years of production. These changes are often necessary, and are part of the fascination to this hobby.

The Rolled Edge coins are considered close to the original Saint-Gaudens design, with the minor addition of the rim, but their central striking softness became their undoing and provided an opportunity to make modifications to the details of the concept. These 42 or so coins represent a high point in our coinage, which of course had to be chisled down to a more workaday style that would endure circulation and would strike up well enough under the constraints of the coining press. These Rolled Edge coins remain one of the most popular and elegant of the 20th Century and their rarity remains legendary. Possessing one of these places any collection into the catagory of greatness that will long be remembered. **Pop 1; 17 finer (PCGS # 8851)**

1907 $10 Indian. Possible New Discovery

1612
1907. No periods. Special Strike? New Variety? Our grade is MS-64. The edges are prooflike and different than the normal No Periods type. Three raised edge separation lines between the stars are far more pronounced than normal. This coin was sent to PCGS for special status consideration and there was no consensus of opinion. The Philadelphia Mint was trying all sorts of things to get these Saint-Gaudens style coins to strike up. Perhaps the collar was adjusted here, to allow for slight expansion of the planchet, as Barber needed to increase production and get these into circulation after the delays and striking troubles of the initial styles. Further study is needed.

Gem 1908 $10 Indian. No Motto

1613
1908. No Motto. PCGS graded MS-65. CAC Approved. Only 33,500 minted, making this one of the lowest mintages of the entire series. The surfaces are satin smooth and offer considerable glowing luster. The broad open fields show only a few minor scuffs, and no deep or distracting marks. Sharply struck to the centers, and this is worthy of note as most of the No Motto 1907 pieces show softer central strikes. An important and elusive type coin or one for the date specialist. At the gem level, this issue is somewhat challenging to obtain, but can be had for a price. Frosty with light golden toning. **Pop 29; 15 finer (PCGS # 8853)**

Merely 137 examples are estimated to have survived in all grades, A wonderful looking example with some light lines indicating a past cleaning or wiping. This is one of the tougher dates of this series to obtain in any grade! Don't let the minor cleaning issue get in the way of admiring this rarity. Despite a mintage of 126,500 pieces these obviously ended up being melted in the 1930s as so few are known today. High Grade Rarity 1930-S $10 Indian

1637
1930-S. PCGS graded MS-65+ PQ. CAC Approved. Only 96,000 minted of which merely 237 examples are estimated to have survived according to CoinFacts. Full mint bloom and should be regraded as the surfaces are simply amazing in quality, with incredble mint freshness and bloom. It would be difficult to imagine a more attractive example of this scarce issue. So many 1926 Indian eagles were struck in that there were enough $10 eagles on hand to supply the needs of banks until 1930. By then the roaring economy was starting to turn down, and demand for new coins was tepid. Hence the mintage of the 1930-S issue was limited.

Given so few of these were initially produced it is remarkable how many choice and finer examples exist. Those that die enter circulation in the early 1930s were quite limited, the majority that do survive are in mint condition, with only a few pieces showing even light circulation wear. Gems are reasonably available for a price, such as this example, but can be had with patience. A few finer examples exist than this offering, but precious few. The Finest 1933 $10 Gold Indian

1638
1933. PCGS graded MS-66. CAC Approved. The legendary 1933 Indian Eagle is represented by no more than 40 examples are estimated to have survived. This one is likely to be the very finest known, although one other exists at this grade level seen by NGC. That particular coin was last sold by Stack's in October of 2004 for $718,750 and has not been seen at auction since that time. This coin being offered now, was not known to most of the numismatists of this generation, and had never been certified until just prior to this auction. It is the finest seen by PCGS. Well struck, very frosty, and the finest example we have ever seen.

The mintage in the early months of 1933 started off with a bang, a total of 312,500 pieces were struck. However, worldwide troubles were brewing that would alter the course of many countries. The price of gold had been set artificially low in the early 1920s for the amount of paper money in circulation. By the 1930s pressure was building on various countries gold reserves, the flow of gold lost all balance and international transactions saw a dramatic increase in the flow of gold away from country after country. In order to stem the tide, most of the European countries ceased to honor their prior pledges and "went off" the gold standard. This put further pressure on the countries that remained on a gold standard. In early 1933 the international pressure focused on the United States, whose tremendous gold reserves were under what seemed to be worldwide attack. Armoured cars lined up in New York to take the gold from the reserve banks to the nearby docks bound for overseas as demand for payment in gold bullion continued.

March 4, 1933, Franklin D. Roosevelt assumed the presidency of the United States and he took immediate steps to halt this flow of gold out of the country. The Great Depression was worsening, and something had to be done. By following other European countries, Roosevelt took America off the gold standard, calling in all non numismatic gold coins from the population. A bank holiday was declared and the gold reserves were revalued higher at the stroke of his pen.

The first shipment of 1933 eagles had taken place on January 19, 1933. Other shipments followed and some of these were released through the normal course of events, up to the day before March 4, 1933 when Roosevelt was inaugurated. This is the open window where people in America could have obtained a 1933 $10 gold piece and kept it, but given that only 40 so exist today, not many had the wherewithal, time or money to purchase one of these before the window was slammed shut. Unlike the 1933 double eagle, which is illegal to own (other than the sinlge specimen from the Farouk Collection) it at least is possible to possess this issue. Additional reading can be found in the book Illegal Tender: Gold, Greed, and the Mystery of the Lost 1933 Double Eagle by David Tripp. **Pop 1; none finer. High Grade Among The Finest 1850 $20 Liberty

1639

1850. PCGS graded MS-64 PQ. CAC Approved. Semi reflective surfaces on both sides of this majestic near gem! The obverse, particularly the fields are outstanding in quality and appeal. Type 1 double eagles are seldom found above a low grade of mint state, even for these so called common dates. Look at the Population Report of PCGS and the Census of NGC. Rarely are coins found in choice grades of MS-63 or finer for most dates, the only real exceptions are the various issues found on shipwrecks. The obverse is simply stunning, and would easily grade gem were it not for a minor scrape running roughly horizontal behind Liberty's ear in her curls. On the reverse the originality can't be denied, with a solitary ancient copper speck at the N of UNITED and faint traces of copper toning elsewhere. Overall this is a great looking coin for the first major year of production.

Recall that the double eagle or $20 dollar gold coin was first authorized in 1849, coinciding with the floodgates of gold opening from the mines, valleys, streams and fields of California. As the gold floated its way across the oceans to the east, an opportunity to create a new and larger gold eagle was presented, and sure enough the double eagle was born. This date has been particularly popular because this is the first year these were produced for circulation, as the two pattern coins of 1849 were never available even to collectors. **Pop 2; none finer at PCGS (PCGS # 8902)**

Lovely 1850-O $20 Liberty

1640

1850-O. PCGS graded AU-53. Nice golden toning over vibrant, fiery fields that offer reflective surfaces on both sides. This early New Orleans double eagle is one of the first of its kind, first authorized in 1850 these tend to be found in much lower grades than seen here, and often with abraded surfaces from general circulation that lasted for years—even decades. This prized date and mint was clearly set aside early on, and remarkably saved. The eye appeal is strong for the grade assigned, and the quality of this handome piece will never go out of style. Many of the ships carrying newly discovered California gold made a stopover in New Orleans and no doubt one of the miners made a deposit of gold at the New Orleans Mint to create this amazing double eagle. Certainly quite scarce this nice and tough to find appreciably finer. **Pop 25; 18 finer (PCGS # 8903)**

Absolutely Incredible 1851-O $20 Liberty, Finest Known

1641

1851-O. PCGS graded MS-63. Fully untoned and well struck. Reflective fields on both sides which is commonly seen on these early New Orleans double eagles. Rarely are they found so well preserved, particularly so for this issue. In fact, noted expert Doug Winter believes that the only other MS-63 example certified by NGC was likely an MS-62 high end coin that just became upgraded to MS-63 in recent times. That makes this example all the more desirable as it earned an MS-63 from PCGS the first time through, notice the quality of the fields and devices and see what you think! Its a great looking coin, and which we believe will stand tall as the Finest Known for this issue.

It is notable that several examples of this date and mint were found in the shipwrecks of the S.S. Central America and S. S. Republic but none of these coins were mint state, having been in circulation for some time before those ships were lost. Thus, despite a mintage of 315,000 pieces, the 1851-O double eagle is quite elusive in mint state. Add to this fact that the present coin has been out of the numismatic marketplace for generations, and you have a real treasure that was sitting in a safe deposit box for decades! If you are a specialist in New Orleans coinage, or just appreciate high quality branch mint pieces, then be sure to stop and enjoy this elegant double eagle before it crosses the block, for once it is sold, it may not appear again for many years to come. **Pop 1; none finer. Tied For Finest Known. 1857 Double Eagle

1643
1857. PCGS graded MS-64 PQ. CAC Approved. Lovely golden toning on both sides. Probably the Finest Known and tied with the example from the Harry Bass, Jr. Collection which is also graded PCGS MS-64. It is noteworthy that only two examples of this date and mint were found on the S.S. Central America shipwreck (which sank in September, 1857), neither of which even approached the present coin in terms of quality. Similarly the S.S. Republic shipwreck of 1865, contained several of this issue, but none were mint state. An exceptionally fresh and attractive coin, with abundant mint frost and luster, and a solid strike. What really sets this apart though, is the amazing quality of the surfaces, remarkably satin smooth for a Type 1 double eagle. **Pop 2; none finer. Deep Cameo Proof 1899 $20 Liberty

1646
1899. PCGS graded Proof 64+DCAM PQ. CAC Approved. An amazing coin in hand which commands attention not only for its amazing quality but also for its regal golden hue. Only 84 minted in proof and this one of the finer examples known of an estimated population of approximately 30 pieces today. Retaining both memorable quality and ample contrst, this coin brings with it considerable eye appeal. The double eagle or $20 coin is of course our highest regularly circulating coin of this era, the denomination itself was borne out of the California Gold Rush of the late 1840s and 1850s. Gold came out of the ground and rivers in abundance from that state, and gold coinage increased, topping off with the massive double eagle coin for general circulation. The even larger $50 gold pieces were struck by the teritorial minters only in the early 1850s, but those coins were deemed too large for general circulation in the east. Here is a particularly handsome examle of this ever popular design, and a coin which any numismatist will always cherish. A nice untoned example. **Pop 2; 3 finer in 65 (PCGS # 99115)**

Choice Proof 1902 $20 Liberty

1647

1902. PCGS graded Proof 63 PQ. CAC Approved. Only 114 minted and this is the first year of the "all brilliant" style of Proofs after years of seeing highly frosted devices which created a number of Cameo or Deep Cameo coins, the 1902 issue offered a more uniform brilliant style with little contrast between the devices and reflective fields. In fact, PCGS has only grade a couple of coins as having the Cameo appearance for this date, and virtually all other 1902 Proof double eagles lack this contrasting feature. Nevertheless, this is how these coins were struck, and this is one of the finer examples which offers excellent orange-gold color, booming reflectivity and strong visual appeal. The number that survived is likely in the 45 pieces range quite low considering the mintage of 114 pieces. PR-63 is right at the middle of the bell curve for this issue as well, with several graded slightly higher, but perhaps even more graded in lower grades including circulated, mishandled examples. A rare issue and important coin that displays the change in proof format for the Philadelphia Mint rather well. **Pop 9; 12 finer, 10 in 64, 1 in 65, 1 in 66+ (PCGS # 9118)**

1907 $20 St. Gaudens. High Relief, Wire Rim

1648

1907. High Relief, Roman Numerals, Wire Rim. PCGS graded MS-65. A subtle touch of golden toning graces both sides of this beautiful gem example. This has always been one of the favorite coins, indeed if not the favorite coin stuck by our mints. The devices are exceptionally beautiful, with Liberty striding toward the viewer while the eagle on the reverse seems to fly right off the coin. The satiny luster exudes off the fields, and the glory rays surround the central devices, offering both focus to the centers as well as protection of the fields. Scarce this nice and rare any finer, this example resides in the top 3 or 4 percent of those seen today from the original mintage of 11,250 pieces, with finer coins few and far between. A perfect selection for the advanced specialist who desires quality, eye appeal and historic numismatics **(PCGS # 9135)**

1907 $20 St. Gaudens. High Relief, Flat Rim

1649

1907. High Relief, Roman Numerals, Flat Rim. PCGS graded MS-65+ PQ. CAC Approved. The 1907 High Relief, Flat Rim is considered to be two to three times as rare as the Wire Rim style of High Relief. As many collectors desire an example of each style of High Relief, these Flat Rim coins bring a modest premium, but nothing compared to the overall rarity when compared to the Wire Rim coins. The surfaces exhibit the classic deep dish fields with the devices standing tall above the center of the coin. Liberty appears to literally walk right off the obverse. Similar on the reverse the elegant flying eagle has such exceptional depth that he appears to be flying above the coin. The total number known is likely around 1,000 to 1,500 pieces given the numbers graded by PCGS, although they estimate a higher number of 2,500 with the majority being mint state. Approximately 20 percent of those known do exhibit circulation evidence. This splendid gem is worthy of the finest collection, and will be a stunning addition to even the most advanced set. Very choice in every regard.

These majestic coins were the result President "Teddy" Roosevelt demanding improvements to our coinage. He discussed with the famous sculptor Augustus Saint-Gaudens as early as 1905 and pleaded with him to assist in designing new coins, to replace the "atrociously hideous" coinage then current. Saint-Gaudens had tried to work with the Philadelphia Mint before, but always found the institution unwelcoming to outsiders. At last Saint-Gaudens had a powerful ally, the President of the United States! What could possibly go wrong? Well we all know that story. Soon Saint-Gaudens was producing models of incredible coins, with three dimensional relief that simply could not be struck up in a single blow from the dies by even the strongest coining presses. These High Relief coins required three to five blows from the dies before they were struck up adequately, a fact that simply could not be accomplished with any degree of speed. Each coin required examination, multiple strikes and time, time which production schedules simply did not allow. Meanwhile Saint-Gaudens passed away from a long standing illness and seeing his coinage come to fruition was left to his able assistant Henry Herring. It was through Herring's efforts that these High Relief coins were produced. After approximately 11,250 pieces were created, coinage of the High Relief style was halted, and soon a greatly reduced, modified and less glorious 1907 double eagle was being struck—each just one time—and ready for the mass production that the Philadelphia Mint needed to achieve. Hence these High Relief coins stand as a testament to the artistic desires of a great sculptor and his assistant, who went against the Mint officials and produced what is arguably our most handsome coin. **Pop 9; 60 finer (PCGS # 9136)**

This lot also includes the original box of issue, and the box is in pristine condition. These coins were struck in order to be sold for the benefit of the Panama-Pacific Exposition of 1915 which was held in San Francisco, which would celebrate the world wide opening of the Panama Canal on August 15, 1914. This canal would save ships weeks in bringing needed goods from the Atlantic to the Pacific, and vice versa by eliminating the need to sail or motor around South America. Of course another reason for this celebration is that ships from our navy could quickly respond from one ocean to the next, blending the Atlantic and Pacific fleets somewhat, and allow for a much more rapid naval response when a war broke out. After 100 years in operation it would be hard to calculate the value to commerce of the Canal, with the fuel saved in moving goods all over the planet and the time saved as well. Needless to say, this has been an extremely beneficial technological advance for everyone. **Lot of 5 coins.**

Estimated Value $125,000-UP
